# 180 Campers Die in Truck Blast in Spain

From Wire Dispatches
TARRAGONA. Spain. July 11
A THEOREM Spain. July 11
A THEOREM Spain. July 11
A THEOREM Spain. July 11 A runaway truck carrying cooking gas exploded at a campsite near here on the Mediterranean coast today and estimates of the dead ranged as high as 250, with as many more injured.

The police said they had recovered 180 bodies from the campsite ists. Tarragona is about 50 miles where the propylene gas explosion south of Barcelona.

A Madrid propylene transporta-tion company — Cisternas Reuni-das — said an investigation was in progress.

The tank truck overturned while negotiating a bend, according to police, and roled ioto the campsite. which was separated from the highway by a cement wall.

The police said the truck, traveling about 40 miles an hour, hit the wall before exploding and that the hlast set off a chain reaction of explosions in hundreds of butane bot-

to the disaster. Officials said more than 500 campers were at the site and the victims included entire families. Many were believed to be French and West Germans, and possibly some Dutch and English.

A police officer said the scene resembles hell or what we think hell is like."

Witnesses said some bodies were recovered from the Mediterranean. 100 yards away, where they had been hurled by the force of the

A policeman who was at the camp at the time of the blast, said: "It has all been terrible. All of a sudden a terrific explosion burst out and flames engulfed us.

Black Plunges From Window

# **Inquiry Ordered in Death** Of South Africa Prisoner

ed States.

JOHANNESBURG. July 11 (NYT) — The South African gov-ernment bas ordered a high-level police inquiry into the death of a young black man who fell from the lifth-floor offices of the security police in Port Elizabeth yesterday. It was while in the custody of the Port Elizabeth security police, in the same building, that black leader Stephen Biko received his fatal head injuries 10 months ago.

Justice Minister James Kruger issued a statement today saying that be had appointed a police major-general, whom be did not came, to conduct an immediate investigation into the circumstances surrounding the death of Lungile Tabalaza, 20. Over a two-year period, 22 persons have died in the custody of the se-curity police, including another Port Elizabeth man, George Botha, a 30-year-old teacher, of mixed race, who fell to his death in the stairwell of the same building in December, 1976.

# **Shield Against Furor**

Mr. Kruger's statement, issued 12 hours after Mr. Tabalaza's death became known, reflected the government's desire to avoid a repetition of the international furor over Mr. Biko's death. South African security police were exonerated in his death by a magistrate's

A storeowner found Mr. Tabalaza in a pool of blood on the street at 3:05 p.m. yesterday. He apparently had fallen from a fifth-floor window of the Sanlam building, where the security police have offices on the fifth and sixth floors. Mr. Kruger, calling the death a suicide, said in his statement that the man had jumped from the window after being arrested on charges of arson and theft.

The justice minister said that the investigating officer would review the incident "with a view to possi-ble disciplinary action." He noted that the police had "strict instructions" to do their utmost to prevent detainees from committing suicide. The instructions, issued amid the spate of alleged suicides by blacks eral panic because explosions were going off all over the place; it was unimaginable."

The Los Alfaques camp is at San Carlos de la Rapita, south of Tarra-gona, and is a popular camping site for French and West German tour-

Four small houses in the vicinity of the camp were destroyed along with nearly 100 camping trailers. Witnesses said that 12 bungalows and a discotheque on the site were blown to pieces.

A source at a nearby bospital said that more than 50 injured per-sons had been received and that the majority were io serious condition. Medical officials were baving

trouble finding translators to help identify the dead and jojured. It basn't been easy since there are people who have refused to translate because of the shocking mutiiles carried by the campers, adding lations of the injured," a police official said.

# Message From Scheel

BONN, July 11 (AP) — West German President Walter Sheel sent a message of condolence today to King Juan Carlos of Spain after learning of the explosion at a Tarragona campsite.

"I ask you to express my deep sympathy to all the families involved," he said in a telegram made public by his office."

rent Moscow political trials in both ment after he openly criticized the East German political system. In an interview on West German

relevision and in a book titled "The Alternative," published in West Berlin, Mr. Bahro said Communist leaders had supplanted socialist ideals with a "system of bureaucratic centralism dominated by an

organized lack of accountability."

Imprisoned last summer, Mr. Bahro was convicted 10 days ago on charges including the use of in-telligence methods to belp bostile aroups in West Germany. Officials he "received instructions" from the Society for Human Rights, which they said was run by Western intelligence services.

# **Hanoi Charges** Air Intrusions

BANGKOK, July 11 (AP) — Vietnam claimed that four Chinese warplanes violated its airspace, fly-

ing over as much as 19 miles of Vietnamese territory. The Hanoi radio said that the flights occurred on Sunday. The Chinese charge d'affaires in Hanoi rejected a protest note from the Victnamese government yesterday on the ground that he "had no knowledge of the incident."

The broadcast said that two of the planes flew 16 miles over Quang Ninh province and two flew 19 miles over Cao Lang province. No other action by the planes was

# Leftist Papers in Europe Criticize Dissent Trials

PARIS, July 11 (Reuters) - The French Communist Party daily L'Humanite said today that the banning of journalists and foreign observers from the dissident trials that began yesterday in Moscow casts doubt on the charges against the defendants.

The fact that not one journalist or foreign observer is at the trial and that Soviet authorities have rejected the defense lawyers chosen by the accused casts immediate doubt on the validity of the charges," L'Humanite said in an

"Even more so, since the idea of espionage bas been widely used in the past there against innocent peotike to know, in particular, what kind of 'secrets' Anatoli Shcharansky leaked, if the charges are to be believed.

# 'Breach of Freedom'

"The idea of anti-Soviet agitation seems, likewise, dangerously vague. Is Alexander Ginsburg guilty merely of disagreeing with the policies of his government? That, we think. is his right as a citizen, and to bring the matter before a court is, quite simply, a breach of freedom of speech," L'Humanite said.

The Italian Communist Party newspaper L'Unita warned that tough sentences could seriously damage detente.

Repeating earlier crincism of the trial of Yuri Orlov, L'Unita said in a front-page commentary that the Italian party rejected the concept and practice of punishing citizens

# Firing Reported From Christian Areas in Beirut

Witnesses said that the sniping

ame from Ain el-Rummanch, the Christian slum quarter and strong-hold for the two militias that Syria was trying to crush until Israel threatened to intervene last week. Instead of replying with heavy rocket and artillery barrages as it did for six days, the Syrians put the adjacent Moslem Shiyah and Chris-tian Hazmieb districts out of

difficult to determine who was sniping at whom, but most of the gunfire was coming from Christian neighborhoods," a witness said. The outhreak threatened the six-day-old truce that ended the worst clashes between the Syrians and Christian militiamen bere since the Syrians ended Lebanon's civil war 20 months ago.

bounds for civilians. "It was very

# China, U.S. Hail Science Talks

TOKYO, July II (AP) — Teng Hsiao-ping, China's senior vice premier, yesterday told a 14-member U.S. delegation in Peking that "scientific and technological exchanges between China and the United States are of treat significance." States are of great significance," the official Chinese news agency Hsinhua reported.

Hsinhua also said that Dr. Frank Press. President Carter's science and technology adviser, told Mr. Teng: "Our discussion on cooperation in science and technology bas been very good. This is the first time for the leaders of our two countries in science and technology to have a discussion on cooperawhich a violinist gets off a train, plays for two hours and then takes

a cab to the station. The city's 14 movie bouses show mostly soft pornography and earth-quake-hurricane-and-firestorm pictures. Someone looking for the most interesting current German Hans-Juergen Syberberg's "Hitler, ein Film aus Deutsch-land," would find it in Paris but not in Bonn, where it has never been shown.

But there is surely not much de-mand for the film. With an income level about 30 percent above the national average, a substantial number of civil servants (about 30 percent of the working population), and an above-average number of old people (the city's birthrate is in lowest quarter nationally). Bonn is neither at ease with eccentricity nor clamoring for innovation. Even its university has a reputation for a rather conservative student body.

The charge of provincial duliness is disputed by the city's public relations office and by the assistant, mayor, Hans Steger, who defended Boun by saying. "I was born here and I should know. If I had found it boring. I would have moved long

### Quiet Charms

Indeed, there are many people who like the city. It is quiet. It does not have snow. Children get along well here. There are even some who find charm in things like the threeand four-digit telephone numbers that still exist locally —dial 561 for Chancellor Schmidt's office — and these people thought it was sweet that the mayor had to appeal to the citizenry to provide beds for those journalists among the 2,500 expect-ed for the summit who could not fit into Bonn's botels.

Bonn is taking the big meeting calmly. It got more excited about 350 street names that were changed at the beginning of the year in order to remove confusing duplica-tions. In the process, Schu-bertstrasse became Men-delsschnstrasse, and the equivalent of Cherry Street was turned into Old Cemetery Lane.

When the wife of a Frenchman living on Cemetery Lane wrote to question the change, suggesting that it was a bit macabre, she got a letter back from the mayor saying that the matter was a question of taste and that there had been no other complaints.

"If it's a question of taste," the woman said, "I find Bonn un village avec des ambitions.

# Nigerian Envoy Praises Cuban Role in Africa

NAIROBI, July 11 (AP) — ister Andrei Gromyko tomorrow Nigeria's envoy to the United Na-tions has hailed Cuba's involve-ministration weighed a decision on ment in Africa as the continent's ways to protect U.S. land-based "greatest asset" and attacked "dou-missiles from potential Soviet ble standards" of Western nations, assault, including the United States,

# 2 Recruits Die; U.S. Sergeants Are Charged

COLUMBIA, S.C., July II (AP)

— Two drill sergeants who put recruits through "excessive and
prolonged" physical training during their first day in camp have been charged with involuntary manslaughter in the deaths of two trainees, Army officials said yester-

Sgt. Willie Alexander of Timmonsville, S.C., and Sgt. 1st Class Lawrence Chapman Jr. of Pickens, S.C., were also charged with dere-liction of duty and maltreatment of he stricken trainces, Lt. Col. James Garoer said.

The preliminary findings indicated that Pvts. Wayne Krassow of Cygnet, Ohio. and Lester Watts of York, S.C., both 18, and 60 other recruits were subjected to "excessive and prolonged" exercises soon after arriving at the base, according to Lt. Col. Garner.

Mr. Krassow and Mr. Watts,

who arrived at their basic training area on the afternoon of June 29, when temperatures were in the mid to upper 90s, collapsed that night. Both died of heart failure due to heat stroke, doctors said.

# Fewer Rich Escaping Tax

WASHINGTON, July 11 (AP) — The number of wealthy Americans who escaped paying taxes dropped sharply in 1976, after passage of a law aimed at tightening tax loopholes, the Internal Revenue Service said. The tRS said that 57 individuals with adjusted gross in-comes of more than \$200,000

on their 1976 tax returns com-pared with 230 such cases in 1975 and 244 in 1974. 1975 and 244 in 1974.

The IRS said that enactment of the Tax Reform Act of 1976 was apparently one of the factors that led to the drop. The 1976 law tightened use of tax shelters by the rich and in-creased the "minimum" tax, which is intended to assure that

wealthy people pay at least

some income tax,

tion yesterday.

ALBUQUERQUE, N.M., July 11 (AP) - A 27-year-old cancer patient has received state permission to smoke marijuana to belp offset the effects of chemotherapy.

A patient qualification review board, established under a new marijuana research program, approved the treatment for Lynn Pierson, a business student at the University of New Mexico. Under the program, marijuana will be obtained free from the U.S. government. Mr. Pierson's doctor will prescribe the dosage and a

state-run pharmacy will dispense it.

Mr. Pierson lobbied the 1978 New Mexico Legislature for a bill to provide legal use of marijuana for glaucoma and cancer patients. He said that he had used illegal marijuana for its effect on the nausea that often accompanies chemotherapy.

Mr. Pierson's father said at a news conference after the review board's action that he originally had been against his son's use of marijuana. But he said: "After seeing how much it helped him, we supported him all the way. We're happy if it can help him. We went through the pain and side effects he had."

Mr. Pierson's application is the only one received so far, but officials said that the program eventually may include about 100 of New Mexico's 10,000 cancer patients. The program requires participants to be state residents and at least 18 years old.

ia that have sprung up among the 300,000 former military men involved in nuclear-bomb test blasts between 1945 and 1962.

### Revised Estimates

Reports of possible barm to people employed in nuclear-power plants will surely exacerbate public concern about the potential danger of the plants to nearby communities. Federal agencies adopted the present standard in the mid-1950s. based on outside experts' recom-

In 1972, another expert group, the Biological Effects of Ionizing Radiation Committee, or BEIR, reviewed the scientific data available federal officials misinterpreted the report by this National Academy of Sciences' committee, said Edward Radford, a committee member and a professor at the University of Pitusburgh's School of Public Health.

"Based on the BEIR report, occupational exposure limits should be dropped by a factor of 10," to one-half of a rem annually, Mr. Radford contended. The committee estimated that a worker exposed to five rems annually for 30 years "is at about twice the risk of cancer as The disclosure has led President a person not exposed," he continued a person not exposed, he continued is person not exposed, he continued is person not exposed.

### Related Debate

Researchers disagree about radiation health hazards partly because of another, related debate: Is pro-longed exposure to low-dose radiation as harmful as exposure to brief, high doses?

The unknown element is: At

Movement in Vienna Talks on Ground Forces

# 'MBFR' Coming Into Detente Spotlight

By John M. Goshko

WASHINGTON, July 11 1WP)

— For years, the abbreviation
"MBFR" has been a mysterious term that pops up occasionally on the inside pages of newspapers usually to be ignored by baffled

Within the past two weeks. though, MBFR - shorthand for mutual and balanced force reductions — suddenly has become the subject of public discussion by both President Carter and Soviet President Leonid Brezhnev. The interest shown by the two

leaders could be a sign that MBFR

soon may be taking a place alongside another, better-known abbreviation, SALT (strategic arms limitation talks), as an important element in the quest for East-West detente. SALT has as its goal a U.S.-Soviet agreement that would impose ceilings on each country's stock-piles of such nuclear weapons sys-tems as intercontinental missiles and long-range bombers.

### **Ground Forces**

In contrast, MBFR involves an allempi to negotiate a reduction in the ground forces — the foot sol-diers and their tanks and guns — that the North Atlantic Treaty Or-ganization and the Warsaw Pact have poised against each other in Central Europe.

The idea has been the subject of formal negotiations in Vienna for almost five years. But until a few days ago the talks seemed to be going nowhere. What suddenly changed things

was the Warsaw Pact's new propos-als, which, on the surface at least. seemed to go a long way toward narrowing the gap in the Vienna

To underscore that point, Mr. Brezhnev, during a major speech in Minsk June 25, characterized the proposals as a major effort to break the deadlock, and he called on the West to assess them very carefully.

# Upbeat Response

The following day, Mr. Carter, in televised news conference, responded in cautious but clearly upbeat terms, "I would say it is a step in the right direction," he said, and we will pursue it."

In private, Carter administration sources say that the Soviet proposals, although outwardly seductive, must be carefully analyzed. The MBFR talks have taken a

number of twists and turns over the last several years. MBFR's first U.S. backer was the Nixon administration, which put it forward as a counter to congressional pressure for large cutbacks in the approximately 200,000 U.S. troops stationed in Europe.

It would be unwise and damaging to NATO's defenses, the argu-ment went, to make a one-sided withdrawal of U.S. forces when they could be used as a bargaining counter to force parallel cuts in the Warsaw Pact forces.

# **Initial Wariness**

Initially the other members of U.S. troops automatically would teroffer that one Carter administra-

ness grounded in apparent concern approach.' about the ability of East European in essen bloc partners to maintain internal stability without the presence of sizable numbers of Soviet troops.

Still, the U.S. position ultimately prevailed. The NATO allies were hrought into line, and Moscow agreed at least to talk about the subject.
The Vienna talks began in 1973.
It was agreed that the negotiations

would encompass the ground forces of those countries in the two alliances with troops on Europe's Central Front: the United States, West Germany, Britian, Canada, the Netherlands, Belgium and Luxem-hourg, for NATO; and the Soviet Union, East Germany, Poland and Czechoslovakia for the Warsaw

Since then, though, the two sides have been unable to agree on any-thing else. Until recently, the principal sticking point was over NATO's insistence that any cuts should be made according to an asymmetrical formula" that would see the East take out more troops than the West.

### Geographical Advantage

NATO says this kind of cut is necessary because the Warsaw Pact has vastly superior numbers, both in men and tanks, and the natural advantages of geography. Soviet troops would have to pull hack only relatively short distances, while the U.S. forces would he withdrawn across the Atlantic.

As a result, the West repeatedly has called for cuts in two stages the first involving just the United States and the Soviet Union and the second bringing in the other countries — to bring both sides' combined forces to a common ceit-

For years, that appeal was rejectby the Russians, who spurned both the idea of asymmetry and the Western argument that the forces involved should be considered as integrated units. Instead, the Russians kept proposing reductions based on percentages of each participating country's forces — a move aimed at constricting the 350,000-man West German land army, the largest NATO force in Central Europe.

In the face of this prolonged impasse, the MBFR talks gradually dwindled in imortance.

# **NATO** Interest Renewed

Then, late last year, NATO interest began to rise again, largely as the result of pressures from West German Chancellor Helmut Schmidt, Mr. Schmidt argued that a SALT agreement would mean that Western Europe's defense would also require considerable adjustments in conventional forces.

This prodding resulted in a new Western initiative, unveiled in April. Basically, it called for a firststage reduction of 68,000 Soviet soldiers and 1,700 tanks, and 29,000 U.S. soldiers and 1,000 tactical nuclear missiles.

To the surprise of the West, the work to Moscow's advantage. And tion official says "absorbs for the

Moscow was wary too — a wari- first time quite a lot of the Western

In essence, the Soviet offer accepts the NATO concept of a common ceiling of 700,000 men for each side. To reach that point, the Russians proposed an initial cut-back of 30,000 of their troops and 14,000 U.S. soldiers; a second-stage cut of 25,000 Russians and 10,000 Americans, and reductions by the other countries that would eventually trint the overall Warsaw Pact force by 105,000 men and that of NATO by 91,000.

# Demand Dropped

And now the Russians have dropped their long-standing de-mand for country-by-country ceilings. Instead, the Warsaw Pact said that it would settle for assurances that no country with forces in Central Europe would be allowed to reinforce them above their present

But U.S. officials, while encouraged, say that a lot of important questions still must be answered.

Their principal problem involves the figures on which the Soviet plan is hased. The Warsaw Pact insists that its combined ground forces number 805,000, while NATO estimate them to appear the 950,000. mates them at more than 950,000.

U.S. sources say NATO has no intention of proceeding on the ha-sis of Soviet figures to reduce its force toward the goal of 750,000 troops on each side. Instead, they say, there will have to be a lot more Soviet cooperation on exchanging

### **Potential Problem**

In addition, the sources say, the Soviet proposals about keeping each country's forces at present lev-els still are almost certain to prove unacceptable to West Germany.

But despite these cautions, ministration sources say they think the Russians are making a serious attempt to get MBFR talks moving.

# **SALT** and **Shcharansky**

The cases brought by the Soviet Union against Anatoli Shcharansky. Alexander Ginshurg and other dissidents have clearly created problems within the relationship between Moscow and Washington. They have brought U.S. and Soviet concepts of justice into conflict, raised disturbing questions of anti-Semetism and included the continuing issue of espionage and counter-espionage by the two superpowers. But Secretary of State Cyrus Vance has said this should not break off the Strategic Arms Limitation Talks and Mr. Vance is right.

The questions aroused by the Soviet trials are old ones in global diplomacy. They helped delay Washington's recognition of the Soviet Union for many years — they dis-turbed the debate over policies in World War II. they were central to the cold war, when even McCarthyism seemed preferable for many than Stalinism in action. And most of the alliances, much of the military preparedness, of the United States was geared to the kind of struggle that might emerge from the clash of concepts.

But while the contest between systems was under way, there was another form of competiuon that engaged the United States and the Soviet Union. This was the development of nuclear weapons. And it soon became plain plague or famine.

that while admittedly the dictatorship of the proletariat might destroy democracy, or the latter destroy the former, nuclear weapons could wipe out both. The common destruction that would be inflicted by such a war, the loss of life and hope, would make the ideological contest a mere exchange of verbiage. There would not be enough left to revo-

So. after Stalin's death, the Soviet government began to soft-pedal this kind of repression of dissidence, while the United States made less of an issue of what remained. Both entered into talks to limit nuclear testing and control nuclear weaponry. And this was the

The SALT talks are not in a very promising stage. Negotiation on a military level is very difficult when the political level descends to such techniques as the Soviet Union employs, such rhetoric as its opponents use in reply. But if the thread is at least sustained, there is the bope of bringing political discussion closer to reality, while keeping the brutal threat of nuclear force under wraps. To return to naked confrontation is too dangerous for a world that already has too many delicate problems to resolve if mankind's worldly home is to have security from war,

# Energy: Preventing Tragedy

'Just Do as I Say and You'll Be All Right.'

By Daniel Yergin

PARIS — Complacency has tems withstand the internal disrup-spread like a thick oil spill tions caused by such economic over all aspects of the U.S. debate about energy. By 1985, however, the United States will likely regret its present inaction. For. by 1985, 1973 embargo, oil and nuclear engive or take a year or two, the United States, along with Europe and Japan, will — if present trends continue — be staring at an energy crisis far worse in economic and political consequencs than the one we all went through in the early 1970s.

It is this dangerous prospect, however imperfectly seen, that is what the upcoming economic sum-mit is all about. Or should be.

The press has been of little help in alerting the public in the United States (and other countries) to the virtually predictable crisis of the 1980s. After all, didn't the oil-producing nations only a few weeks ago announce a "freeze" on oil prices until the end of the year? Isn't the crisis almost taking care of itself? Hasn't oil slipped to "third place" in U.S. imports? That last ing was that some people in Washington were preparing a response in advance to the criticism President Carter will encounter in Bonn this colly to be the most likely present

weekend.
The current state of the international oil market is to blame for
much of the confusion. The market
is temporarily and deceptively loose because of two developments: new oil production in the North Sea and Alaska, and a reduction in demand as a result of worldwide tion thus faces, in its efforts to push energy legislation, an ancient political problem: how to rally the people during seven fat years for the seven lean years that will follow.

What will the oil balance look like by the mid-1980s? New major oil discoveries require up to a decade to be brought into significant production. Except for Mexican oil, no new sources of oil are likely to be on stream before the end of the 1980s. If one assumes some small degree of economic recovery. plus increasing demand for oil by the industrializing OPEC countries themselves and by other Third World nations, demand for OPEC oil is then likely to be 42 to 45 million barrels a day. To meet that de-mand — some 15 million barrels over current production levels — the oil cartel would be producing very near or even at the limits of its

This would lead to a sellers' market again, and prices would go up suddenly and dramatically. As Saudi oil minister Sheikh Ahmed Zaki Yamani warned recently: "Once the surplus is eliminated, neither the United States nor any other superpower will be able to bring about a freeze in oil prices." He added that the real price of oil could double, while some think it could go even higher.

Such a tight market would once again strengthen the hands of the price hawks like Iran. The OPEC nations, much more sophisticated than in 1973, would not need the accident of a Yom Kippur war to spur them into raising oil prices to a level that the world could not

The economic shock of such a price increase would be grave. Hy-perinflation would return as would other major reduction of investment and purchasing power in the industrial world — with catastrophic effects on growth and employment rates as well as on the basic confidence in the system that our type of economy requires. The strains on the balance of payments to countries like France, Italy, and Japan - not to mention the Third World - would be insolerable. One could hardly expect the private banking system to weather this storm with any great degree of

Overall, the economic consequences would likely be a major recession, even a world depression. Meanwhile, the political consequences would also be enormous. How long could democratic sys-

After all, the unattractive scenar-1973 embargo, oil and nuclear energy issues have already created serious tensions among the Western

If the crunch comes, all aspects of international relations would be overshadowed by a bruising scramble for od. For, as the lights flickered and prices skyrocketed, politi-cal leaders in the West would be able to respond only to immediate domestic political imperatives, which could well put them on a col-lision course with other Western

Finally, if we do move into a tight market in the 1980s, the industrial world will become even more dependent on Saudi Arabia, since any major new increments of production would have to come from the seemingly limitless wells of the Arabian Peninsula. That, in report which appeared recently, is an excellent example of a complacency-generating story that is not only misleading but even nonsensical on its own terms. Its real meaning was that some needs in Wash.

> only to be the most likely present projection. If the world economy remains in such poor shape, then demand for oil will drop. But govemments can ignore their citizens' calls to stimulate economic activity only at the risk of being ousted from office - and economic stimulation also increases the world's oil consumption. On the supply side, there seems little realistic hope for salvation in coal and nuclear power, even if most of the environmental safeguards now required were overturned iomorrow. The best bet to avoid a crisis of staggering proportions remains a thorough, but sensible and nonpunitive, program of energy conservation. And nowhere is that more important

than in the United States. For the United States is to energy consumption as Saudi Arabia is to production — the single over-whelming factor. The United States consumes a third of all the oil used in the world every day; a seventh of all the oil used in the world every day is burned on U.S. highways. Unhappily, the United States learned little from the 1973 energy

crisis. At the beginning of this year.
Americans were using 18 percent
more oil than they did in 1973. U.S.
imports had jumped from a third to half of consumption. Whereas in 1973 Americans consumed 14 per-cent of OPEC's production, that figure now stands at 24 percent. At the economic summits, the other Western leaders will be asking

Letters-

io here sketched need not happen. It is not predestined. But, if it is to be avoided, a consensus on fundamental assumptions, combined with political will and foresight, is required. These prerequisites along with new energy sources have so far shown themselves to be in distinctly short supply in the United States.

Daniel Yergin, a member of the Energy Research Project at the Har-vard Business School, is author of "Shuttered Peace" and co-author of the forthcoming "Coming to Terms; The Energy Crisis as It Really Is." He wrote this article for the Interna-tional Herald Tribune.

Carter - and justifiably so - to take measures to reverse those

Call From Moscow
For SALT-2 Action

By Alexander Druzhinin

MOSCOW — Soviet Foreign into trouble in Congress or even be and U.S. Secretary of State Cyrus Vance are to meet Wednesday in well aware of the power wieldest has Geneva to discuss, among other things, the problem of strategic arms limitation. Both the Soviet Union and the United States now ongree that common ground has been found on an overwhelming majority of problems. So a last effort should be made to overcome remaining differences and wrap up the SALT-2 agreement.

Progress notwithstanding there is no reason for optimism. No one can say for sure that the new agreement wilt be signed in the near future. And this makes us once again to take a look at the positions of the sides and find out the cause of the delay in these crucial negoti-

Let's begin with the Soviet Union For the Soviet Union the summit meeting in Vladivostok in 1974 was a milestone which sup-plied guidelines for further cooperation between the two countries in the field of limitation of strategic armaments. That meeting resulted in an understanding which provid-ed a basis for the future agreement.

# Made Proposals

The Soviet Union has never backed out on the commitments it undertook there. It continues to do everything to settle remaining differences on a mutually acceptable basis. It has made numerous proposals to this end. The Soviet Union presented a new package of proposals last May when Mr. Gromyko met President Carter and Mr.

Naturally, such an approach had to be reciprocated by the other side. For all its goodwill, the Soviet Union cannot do the job alone. Has the United States taken as constructive and consistent a stand as the Soviet Union did? I think there is no reason to say so. Moreover, one might think that the more realistic the opporunity for concluding the second strategic arms limitation agreement and the fewer unsettled problems remain on the agenda, the more hesitant and indecisive-

# Aware

While speaking in favor of the

torpedoed by it.

The Soviet Union is certaint well aware of the power wielded by U.S. circles opposed to Soviet U.S. cooperation. We also cannot fail (as see that these circles step up the activities as chances for enaminations of the Washington adjunistration itself: Does it hurry to make clear where it stands obtained whether the United states reality wants to conclude a SALT-2 agreement? Is it doing everything it can ment? Is it doing everything it can't to protect the future agreement against its enomies? I think Watter against its enemics? I think Washington even adds fuel to the fire of passions burning around the agreed ment by fostering suspicion towards the Soviet Union and its foreign policy and frightening people with alleged Soviet military threat. No wonder the atmosphere around the future agreement is gertical. No wonder the atmosphere aroma?! the future agreement is getting worse still. Such an approach call only create new problems for the SALT-2 negotiations.

I shall not try to predict the outer come of the talks in Geneva. One

thing is certain however. The SALT-2 negotiations are ripe for decisions. Further progress at the talks and prospects for a new agreement depend on whether Washing. ment depend on whether Washing ton would give up its inconsistent position or not. I am convinced that the United State would benefit by the agreement no less than the Soviet Union. At the same time, the United States would gain nothing if the opponents of the agreement take the imper hand and if an unrealistic. the upper hand and if an unrealistic position at the talks enables them to hinder the negotiations or thwart hem altogether.

# New Arms Race

Such an eventuality would not only damage Soviet-U.S. relations but also seriously impair the entire process of international detente. A failure of the SALT-2 agreement would result in a new arms race and a further buildup of strategic

As regards the Soviet Union, it is still prepared to seek mutually acceptable solutions to remain problems. It is still convinced that: it is high time to conclude an agreement which would substantially inprove this situation all over the

# Gloom Over Carter's Trip

David S. Broder

WASHINGTON — President VV Carter is going to Europe this week under almost the worst circumstances imaginable. Not since Richard Nixon made his preresignation visits to Moscow and the Middle East has a U.S. chief executive conferred with his counterparts at a moment when there were more reasons for skepticism about his own capacity for leader-

The Soviet Union has dramatized "human rights" policy by staging showcase trials of two prominent dissidents and by tightening the screws on U.S. correspondents in

Moscow.

At home, the sendoff to the economic summit was the concession by Carter's own top economic advisers that inflation in this country will be worse and economic growth slower than they bad expected. As if that were not enough.

Carter must face his fellow beads of government without the national energy plan that all of them regard as the single most important evidence that this nation has the will and the skill to address the fundamental problems facing the internauonal economy.

In the past week, one could hear

grimly realistic appraisals of the problems in U.S.-Soviet relations, in the economy and the energy picture, from the men who advise the president in each of these areas. What is not clear, however, is

wbether these men - or the president they serve - understand the extent to which the present problems have been nurtured by

Carter's tendency to moralize cow empty-handed. Much less was rather than manage his way through the morass of conflicting plans for Africa, the Middle hast interests and powers in the world.

To understand what is happen-

ing now, it is helpful to look back slightly more than a year to the time in 1977 when the characteristic approaches of the Carter administration were being defined. What one sees, time and again, is the president confusing the expres-

sion of good intentions with the devising of a sensible strategy for achieving his goals. His naivete of conception was matched by the naivete of risk-measurement. Carter was as reluctant to give weight to serious opposition as he was to hold his own idealism up to skeptical self-examination. At the press conference on March

24 of last year, for example, he discussed both U.S.-Soviet relations and inflation in terms that are almost ludicrous when read in the light of subsequent events.

On the eve of Secretary of State Vance's first visit to Moscow. Carter said the agenda would include actual reductions in nuclear arms, mutual force reductions in the NATO area, and an elimination of all nuclear tests.

We are going to express our concern about the future of Africa

and ask the Soviet Union to join with us in removing from that troubled continent outside interferences which might contribute to warfare in the countries involved," the president said. "And we will start laying the groundwork for cooperation with the Soviet Union at the Geneva conference which we bope will take place concerning the Middle East.

"These matters are extremely complex," be conceded. "We don't know whether or not we will be successful at all, but we go in good faith with high bopes. The Soviets have been very cooperative up to this point, and we are pleased with their attitude.'

There is not a hint in the press conference of any suspicion that the Soviet Union would, within a week, coldly reject Carter's agenda and send Vance home from Mosand Europe might be exploded.

Yet the warning signs were there.

At this same news conference, reporters noted that Leonid Brezhnev had reacted anguly to Caner's heavily publicized human rights campaign and had said that normal relations would be "unthinkable" if it continued.

No problem, said the president. ne Brezhnev speech, he said, was "very constructive," and if the Soviet president mistakenly thought the human rights campaign was an "intrusion into the internal affairs of the Soviet Union," be, Jimmy Carter, would be happy to assure him that "I don't agree with his assessment." As if that settled

What about inflation? another questioner asked, noting that even then, 15 months ago, the two basic price indexes were in the doubledigit range. No problem said the president.

"I intend to cut down the expenditure of government programs well enough to bring about a balanced budget by 1981. I am deeply com-mitted to this goal. And I believe that we will have unveiled, for the nation to assess, a comprehensive package against inflation within the next two weeks."

There was, of course, no such package, and the goal of a balanced budget has now been officially postponed at least until 1982. A month after this press confer-

ence. Carter was back on the airwaves with an energy plan he proclaimed "the moral equivalent of war.

The failure of his government to gain congressional approval of that plan resulted, like other failures, from both the substantive sbort-coming of Carter's proposals and his enormous underestimation of the opposition. Now the energy failure, along with inflation fears and the deteriorating international climate, spread gloom over his trip to Europe.

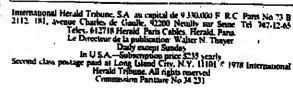

One can only hope that the lesson has not been lost.

# A Rhodesia Alternative mit their own political fate to a fair, interna-

Sen. Jesse Helms' Rhodesia amendment. which would lift sanctions and permit trade with the United States for six months, introduces Congress into policymaking on Rhodesia at a crucial juncture. An earlier version, calling for a 15-month suspension of sanctions, came within three votes of passage. Two considerations belp explain why a proposal vehemently opposed by the administra-tion did so well. First, the moderate, oneman. one-vote, multiracial system promised by the "internal" government that was set up last March looks better to many senators than the Communist-oriented black guerrilla regime they see as a likely alternative. Second, perceiving the administration's policy as essentially pro-guerrilla, these senators thought that by temporarily lifting sanctions, they might even the odds in a struggle the

guerrillas now seem almost sure to win. Ian Smith and the internal black nationalists do promise a result compatible with U.S. interests and values, or one more compatible than the Angolan-style regime that could emerge from the black civil war likely to follow the collapse of the internal regime. The protections for whites in the internal setup offend some Africans, including the "front-line" states, and the State Department, We have long felt, however, that the constitution of Rhodesia or Zimbabwe should reflect the preferences not of the front-line states or of the State Department but of its people. The "external" guerrillas are bound on blocking the elections that would legitimize the internal settlement. They insist they will not sub-

tionally supervised vote. Meanwhile, the United States and Britain urge compromise, but the internal people won't go along because they are losing, the external people because they are winning. The war goes on.

But will the Helms amendment even things out? The argument for it is that it will bring guerrilla leader Joshua Nkomo, regarded by Salisbury as still a tolerable figure, into a negotiation that be rejects now because he thinks he can win it all in battle. The trouble with that argument is that it skips over the possibility that Mr. Nkomo, rather than negotiating, may instead call in the Cubans. To that the response is that the internal people are prepared to fight. But could the United States then stand by?

It is late in the day to try to even the odds in Rhodesia in this way. The situation seems to us to have deteriorated too far. For all the flaws in administration policy, the Helms alternative promises no more than messy confusion. Americans who respect the internal effort might better press the administration to induce more moderation from the Patriotic Front. Why not put the Patriotic Front on notice that U.S. good will depends on its delivery of a reasonable degree of democratic procedure and racial fairness? The "signal" the administration now sends the Patriotic Front is: Almost anything goes, if you don't call the Cubans. That is what dismays Rhodesian and U.S. critics alike.

THE WASHINGTON POST

# Drop in U.S. Unemployment

The astounding drop in the U.S. unemployment rate last month is heartening. It is also totally unexpected. Despite the enormous wave of young people flooding into the labor markets, more people found jobs from May to June than started looking. The unemployment rate dropped from 6.1 percent to 5.7 percent in that one month. Over the past year, employment has risen by some 4 million jobs. a phenomenal increase. With the very large numbers of women now working for wages, the ratto of jobs to population in June was the highest in the country's history.

The strange thing is that it's bappening at a time when the U.S. economy is not growing very fast. Last week, the administration revised downward its esumates of current growth. It now believes the gross national product will expand only about 4.1 percent this year. There is - or, more accurately, there was - an economists' rule of thumb suggesting that a growth rate of 4 percent is necessary merely to keep unemployment from rising. But the growth rate since the beginning of the year has been hardly better than 4 percent and, after the brief spring spurt, seems clearly to be falling. Yet the statistics show hundreds of thousands of new jobs in June alone.

There is a warning in this pattern. The country is evidently closer than the administration, or most other people, would have thought to the point at which a tight labor market begins to generate inflationary wage increases. There are many different measures of unemployment - among blacks it is twice as prevalent as among whites, and among black teen-agers the rate is still 37 percent. But for the population as a whole, unemployment is now low enough to give the White House a new cause for worry: any error on the side of too rapid economic expansion threatens to fan up immediate wage inflation, on top of the present unacceptably high

This decline in the unemployment figures strengthens the hand of the people who consider inflation to be far the greater danger. Above all, it strengthens the Federal Reserve Board, which has been raising interest rates as a brake. The administration is likely to respond by becoming more cautious than

Perhaps the economy is entering a period of growth that will be slow, compared with the hypertonic 1960s. Perhaps it will also continue to behave like an economy in which labor is plentiful but capital is scarcer than it used to be. In the past, Americans pressed relentlessly for higher productivity through investment in labor-saving equipment and. when growth flattened, the result was rising unemployment. But the present figures suggest that companies currently are hiring people to do work that otherwise a new machine

If that trend continues, the effect of prolonged low growth might be earnings and standards of living that are nearly static. The burdens of low economic growth would be shared by almost everybody in that kind of an economy, instead of being focused mainly on an unfortunate few who lost jobs. A triumph of democratic planning you could say - except for the embarrassing circumstance that nobody planned it, or even foresaw it.

# John D. Rockefeller 3d, **Headed Population Panel**

POCANTICO HILLS, N.Y., July with President Nixon, who ap II (WP) — John D. Rockefeller 3d. pointed the commission. 72, the eldest of the five Rockefeller brothers and the one who guided the family's philanthropies and championed public causes such as population control and support for the arts, was killed yesterday in an automobile accident.

, According to police, Mr. Rockefeller was riding in a car driven by his secretary. Monica Lesko, when the car was hit head-on. Police said that a car driven by David Low. 16. first sideswiped another car, injuring the driver, and then crossed the center line and hit Miss Lesko's car. Mr. Low and Mr. Rockefeller were killed and Miss Lesko was

Mr. Rockefeller was the grand-son of John D. Rockefeller, the founder of Standard Oil, the father of West Virginia Gov. John D. 'Jay" Rockefeller 4th and the older brother of Nelson, David, Laurance and the late Winthrop Rock-

### Vast Influence

Unlike the rest of his family, Mr. Rockefeller was not involved in business or politics, but he was by virtue of his wealth and interests a powerful member of the U.S. establishment, and be exercised vast influence in a wide range of areas of human endeavor at home and

Mr. Rockefeller was regarded as an important force in the improve-ment of the U.S. Civil Service, the improvement of U.S. relations with Asia and the expansion of opportuniues in higher education for blacks.

But his widespread renown stemmed primarily from his devo-tion to the cause of population con-trol. Mr. Rockefeller's voice was among the most prominent and outspoken of those who have sought during the last two decades to warn Americans about the possible consequences of unchecked population growth.

He assserted publicly in 1965 "lulus that population growth was "alhe low ready severely challenging our ahilhiden; community institutions and public smal facilities that contribute so much to if or the quality of our way of life."

### **Unassuming and Reticent**

Often described as unassuming and reticent, he gained new public attention in the early 1970s as chairman of the Commissioo on Populatioo Growth and the American Future. In 1972, the commission endorsed a policy of population stabilization for the United States. But its call for liberalized state abortion laws did oot set well

Section 12

the first.

Mr. Rockefeller's efforts on behalf of the Civil Service were reflected by his founding of the Rockefeller Public Service Awards program, set up originally to honor outstanding federal career employ-ees with prizes of \$10,000.

Mr. Rockefeller once explained that he established the awards in 1952, at the height of the McCarthy era, as a means of expressing support for the work of government employees, many of whom were then under attack for alleged Communist sympathies.

Long interested in Asia, Mr. Rockefeller in 1956 formed the Asia Society to "stimulate understanding and knowledge" between the United States and the nations across the Pacific.

### Support for Arts

As a patron of the arts, he was particularly well known for his role in helping to create New York's Lincoln Center for the Performing Arts. His JDR 3d Fund also provided grants to support programs designed to improve art education in public schools.
Since 1952, Mr. Rockefeller had

been board chairman of the Rockefeller Foundation, a major philanthropic organization through which members of the family support public causes throughout the world. In 1932, he married Blanchette Ferry Hooker. In addition to John 4th, they had three daughters, Sandra, Mrs. Hope Spencer and Alida,

# **James Lampert**

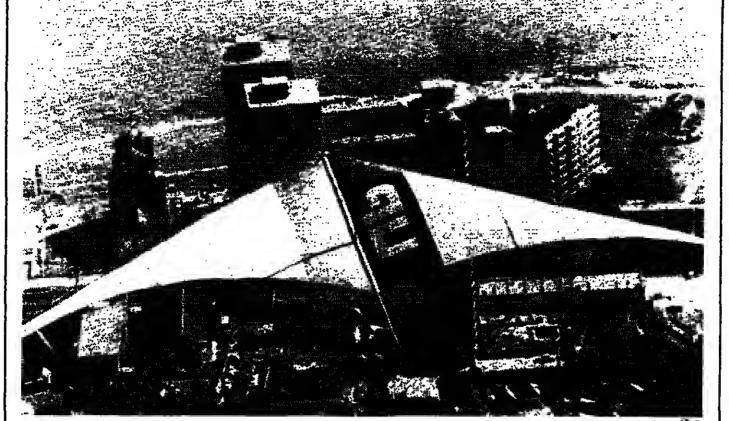

-MARTIN WEIL

CAMBRIDGE, Mass., July 11 (AP) — James Lampert, 64, a for-mer superintendent at the U.S. Military Academy and a former U.S. high commissioner of the Kyukyu Islands io the Pacific, died yester-

day.
The retired Army lieutenant general died at the Walter Reed Army
washington. He Medical Center in Washington. He had been ill for several months.

Mr. Lampert was Kyukyu com-missioner from 1969 until 1972, when the islands were returned to Japan. He had been superintendent of the U.S. Military Academy at West Point from 1963 to 1966 and principal deputy assistant secretary of defense for manpower from 1966 to 1969.

He came to the Massachusetts Institute of Technology in 1972 and was named vice president for resource development a year later, a position that he held at his death.

# Relatives a Real Problem for Korea's 6 Million Kims

By Sam Jameson

SEOUL July 11 - When the young Korean named Kim was a eraduate student in New York City, he met a Korean woman with laughing eyes and a mischevious sense of humor. She, too, was studying abroad.

The attraction was mutual and immediate. He asked her for a dinner date, and they met several days later. "I think I had already fallen in love with her, and I think she liked me, too," Mr. Kim recalled. He had not yet asked her name,

nor had he given his. To Koreans, exchanging names is almost an When he finally introduced him-

self and asked her oame, she became sad. Her name was Kim. 100, and that meant they had a common male ancestor. They could never marry. In South Korea no man and woman with a common ancestor in the male lineage are permitted to marry, by custom and by law, Less than I percent of this nation's 35 million people have defied tradition and married illegally.

An estimated 6 million South Koreans named Kim - about onesixth of the population - trace their common ancestor to a man

is listed as King Kim Su Ro of the year. ancient kingdom of Karaku.

Records in the Karaku Central Ancestors Association in Seoul claim that Kim Su Ro was born in A.D. 41 from a golden egg, grew to an adult in seven years, took a princess from India named Ho as a hride and ruled the kingdom of

Karaku for 158 years.
Today the king's descendants have become the most numerous of all clans in Korea and are normally called Kims of Kimhae. Kim Hong In, director of the

ancestors office, said that some genealogists theorize that the first king actually may have been three different people, all of whom assumed the same name.

Beginning with the second generation, records of life spans assume normal proportions, and from the 10th generation on records are coplous in detail. They show the birthdate. hirthplace, occupation and graveyard site for each man, and the clan origin, birthdate and graveyard site of each man's wife.

The graveyard sites are listed, Mr. Kim explained to eoable the present-day head of each subbranch of the Kim family to offer prayers to all of his paternal anceswho may never have existed, or at tors back to Kim Su Ro, whose least could not have existed as re- grave near Kimhae is the site of

cords claim. That common ancestor large clan gatherings at least once a

Kim Hong In estimated that about 100,000 Kims of Kimhae are being born every year.

Children of female Kims adopt their father's lineage and leave the Kim clan. But because of the Kimhae Kims' sheer numbers, their share of the Korean population continues to expand. Kim Hong In said. And at least 2 million more Kims of Kimhae are estimated to live in North Korea, with thousands of others in Los Angeles, Japan and Brazil.

And another 600,000 Koreans named Ho, descendants of the wife of King Kim Su Ro, cannot marry among the Kims or among each other because the king to honor his queen, had two of their sons assume her family name, That gave both the Kim clan and the Ho clan what is still considered to be a common male ancestor.

Nor is the problem of the ban on clan marriage limited to the Kims of Kimhae. There are only 249 family names in South Korea, and four - Kim, Lee, Park and Choi - accounted for 50.1 percent of the population in the 1975 census. Most of the members of those four families find themelves in the same situation as the Kims of Kimhae.

Recently some in South Korea have begun to challenge what crit-ics call the irrationalities of the tradition. Few wish to get rid of the

family system, which is considered the foundation of Korean society. But some of its excesses and aspects that appear to discriminate against women are being ques-

Last year a proposal was submitted to the National Assembly to abolish the endless ban on intraclan marriage and substitute a han on marriage only up to eight de-grees of relationship. Marriages between men and women whose closest common forebears were greatgreat-great-grandparents — a common blood relationship of 3.125 percent - would have been

Although the proposal never got off the ground, assembly members revealed that an estimated 100,000 couples had defied the ban on clan marriage and had produced an estimated 270,000 children considered illegitimate.

The assembly then enacted a one-time-only law permitting such couples to legitimatize their mar-riages and their children, providing it was done during 1978.

Claims Agent Ordered Cover-Up

# **Ex-Informant for the FBI** Is Said to Admit Murder

By Howell Raines

ATLANTA, July II (NYT) -The FBI's chief paid informant in Mr. Rowe reported the shooting, it the Ku Klux Klan in the early may actually have occurred and he 1960s has told the Alahama authorities that, while on the bureau payroll, he shot a black man to death. then kept quiet about the killing at the instruction of an FBI agent, ac-

cording to investigative documents. The account given to Alabama authorities hy the informant, Gary Rowe Jr., has been denied by the agent whom Mr. Rowe named. A spokesman for the hureau said that its files contained no record of such a shooting, which Mr. Rowe told investigators occurred during racial rioting in Birmingham.

Mr. Rowe, in turn, has accused the FBI of having purged its files about his undercover work in Klan "action squads" in an effort to protect its own reputation, according to investigative records compiled hy the Alabama attorney general's office and the Birmingham police department.

### Questioned in Bombings

Mr. Rowe told Alabama investigators of the previously unreported killing while they were questioning him last year about the 1963 bomb-ing that killed four black children the 16th Street Baptist Church in Birmingham. The investigative doc-uments show that Mr. Rowe twice failed polygraph tests in which he denied direct involvement in that and two other bombings.

As a result of those lests, according to sources close to the renewed investigation into racial violence in Alabama in the 1960s, Mr. Rowe is suspected of having acted as an agent-provocateur, participating in and helping to plan the violent ac-tivity that the FBI had hired him to monitor.

Byron McFall, the agent to whom Mr. Rowe said he reported the shooting, contended that the informant's account was "an absolute falsehood," Mr. McFall, now a state judge in Oklahoma City, was an FBI agent in Birmingham from 1958 to 1964. Mr. Rowe received monthly payments of \$20 to \$300 from the bureau for his reports to Mr. McFall and others in the agency's Birmingham office between 1960 and 1965.

# Ploy Is Charged

Mr. McFall said that Mr. Rowe had fabricated the incident to "gain attention."

Because the polygraph tests indicated that Mr. Rowe was involved in other incidents of violence, however, the Alahama authorities are unsure what to make of the confession. One theory investigators have

developed is that, whether or not

may fear that it will be uncovered in the new inquiries. Thus, in apparently confessing to

a previously undisclosed crime, one of the investigative memos suggested, Mr. Rowe may have been bargaining for blanket immunity from state prosecution for whatever occurred while he was an undercover

# **Soviet Troops End Maneuvers**

EAST BERLIN, July 11 (Reuters) - Soviet troops in East Germany are helieved to have con-cluded their higgest maneuvers in central Europe for three years, held

amid a total news blackout. The only announcement came tast month, when the Soviet Defense Ministry in Moscow said exercises involving 30,000 soldiers and airmen would take place from July 3 to 8 in East Germany, just

south of Berlin.
According the Western sources, the troops practiced a west-east sweep across the country, begin-ning on Thursday between Stendal and Magdehurg near the West German border and winding up yester-day, probably with a mock battle in the Spree Forest region southeast

# The most important picture to come up at Phillips

Entitled, the appreciating art of Phillips the auctioneers, it points in one bold, upwards brushstroke to the fact that Phillips' turnover has more than doubled, in the last four years.

Reading between the lines, it signifies that more people are bringing their pieces to Phillips

for valuation and sale. More customers are attending Phillips auctions in London,

New York, Montreal, Geneva, Amsterdam and their network of regional U.K. auction rooms.

Higher prices are being secured for lots in every sphere from fine art to model soldiers.

In 1978 Phillips is holding over 900 auctions, handling more than 230,000 lots. Each lot will be examined and valued by Phillips' specialists. It will be catalogued accurately and details

will be received by over 20,000 potential purchasers on Phillips' extensive mailing lists including collectors, museums, antique dealers and institutions throughout the world.

You can imagine that all of this calls for a lot of specialist knowledge, a lot of hardworking people and a lot of midnight oil.

And this is what Phillips is all about.

More shirtsleeves than stuffed shirt. More activity than atmosphere. Better results, full stop.

Now you've got the picture, put it to the test, next time you have something you think is worth selling at auction.

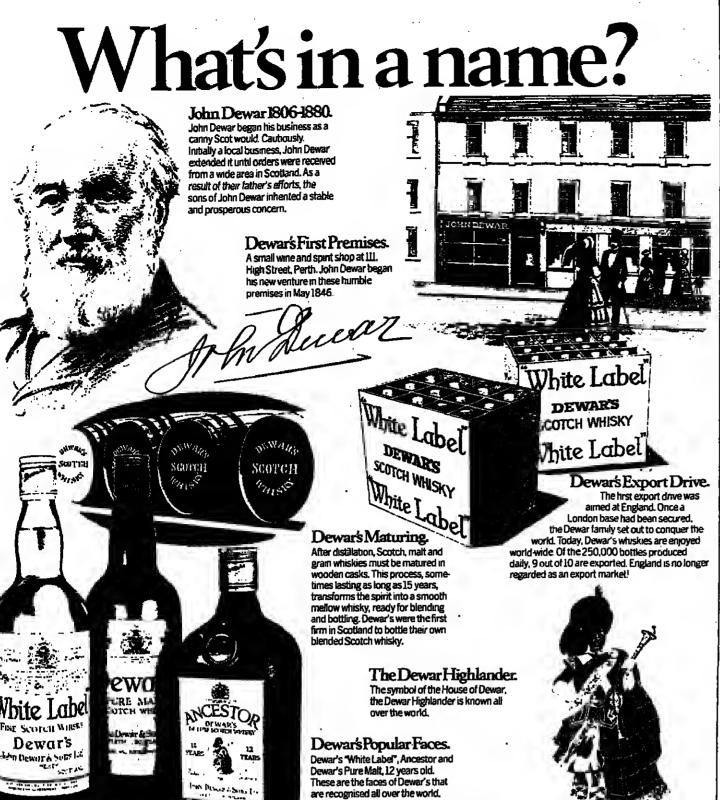

Bring it to Phillips.

# Spain Moves While Seeming to Stand Still If the Socialists had won last which won 9 percent of the vote impose martial law, with or without the government's consent, in the

By Stanley Meisler

MADRID. July 11 — "We Spaniards fear ourselves," a member of the Cabinet said the other day.

This fear, justified by history, has slowed the drama in Spain's incredible transition to democracy. The slowdown is probably healthy. The fear has spawoed caution. As a result of the caution, Spain sometimes moves now while seeming to stand still. The steps taken seem imperceptible until measured against where Spain stood before.

There are great weaknesses in this. Democracy needs drama to function well. The people need to know where they are going and why. Yet, on balance, Spain's fragile democracy may gain strength from all the quiet caution.

Dramatic Changes

Franco died in November, 1975. after ruling Spain for almost four decades. After hesitating a bit, his successor, King Juan Carlos, set off on a period of dizzying change. The king dismissed bir one premier and experienced becomes a Adel and appointed his own man, Adoland appointed his own man, Adolfo Suarez, Mr. Suarez pressured
Franco's rubber-stamp parliament
into abolishing itself. Politicking
was suddenly allowed. In defiance
of the army, but with the encouragement of the king, Mr. Suarez legalized the Communist Party. On June 15 of last year. Spaniards elected a new Cortes (parliament) in the first free elections in 41

Then, as if Spaniards were fearful of their pace, the drama slowed. Spanish politicians settled down to write n democratic constitution. It has been a laborious and dull process. There is no doubt that Spain will bave the constitution before the end of the year, but the significance can be exaggerated. Spanish constitutions have never meant much. Spain has had nine since the first was written in 1812. They lasted an average of 15 years each.

Period of Compromise

More important than writing the constitution, the politicians have tended 10 accommodate each other in the last year, to work out the rules of the political future. There have been changes of attitude, changes of mood that are sure to control Spanish democracy once the drama picks up again. And it probably will pick up again by the end of this year or early next, when municipal and parliamentary elections are expected.

The most significant change has probably been in the perception of the Socialist Workers Party, the largest opposition party. A year have a two-party system somewhat matters worse, ET ago, it was impossible to imagine like that of Germany or Britain, A cnjoy the sympath bitter left-right confrontation nority of Basques. The danger is the confrontation of the could not imagine it.

from them. The king, who had the legal right then to ignore the returns, would never have appointed a Socialist premier. The military would not have allowed it. This re-ality mocked Spain's pretensions to democracy.

Respect for Socialist

All that has changed. When the polls show the Socialist Workers Party to be more popular than Mr. Suarez' Union of the Democratic Center, there are no cries of outrage. When the newspapers publish photos of Socialist leader Felipe Gonzalez, 36, playing goalie in a soccer match between journalists and politicians, it is clear to the readers that Mr. Gonzalez might be their premier some day.

The change has been wrought carefully by King Juan Carlos and Mr. Suarez. They have spent the year treating Mr. Gonzalez as the respectable leader of the opposition. But by his the Spanish people. tion. Bit by hit, the Spanish people, whether they would vote for him or not, bave come to accept the possibility of his leadership.
It is not known whether the generals have fallen in line with this

view. If not, they have isolated themselves. Spain is not polarized the way it was before the civil war, when Franco's uprising against a leftist government was welcomed hy at least a large minority of the opulation. There is, of course, no certainty

that the Socialists can win the next elections. No marter what the polls say, Mr. Suarez will be a formidnble opponent. But it is inconceivable that victory would be stolen from the Socialists if they won.

Confrontation Avoided

Mr. Suarez has worked to avoid the polarization and bitter confrontation that led to war in the 1930s. In doing so, he has reflected the fear of most Spaniards that democ-racy may lead to violence. Mr. Suarez and Mr. Gonzalez re-

portedly have met often to determine the rules of their competition. It is understood that they have agreed that their parties may compete for the same voters - those in the center. This would keep Mr. Suarez' followers from moving to the right to attract the hard-line Francoists and keep the Socialists from moving to the left to attract Communists. That is why Mr. Gonzalez is trying 10 persuade his party to stop calling itself Marxist.

obstacles. The Communist Party, fed up with Basque terrorism, will

year's parliamentary elections, the last time, might gain enough votes victory would have been stolen to force the Socialists into an alli-

Consensus Stressed

In his zeal to avoid confrontation, Mr. Suarez has become almost obsessed with consensus. Every major issue of the last year has been handled by private agreement

among the politicians. Consensus has made the Cortes impotent, li has little to do but ratify decisions made by the politicians in secret. It has even laid aside its powers to air social issues not relat-

ed to legislation. Consensus has its critics. Jose Maria de Areilza, a former foreign minister, said recently that "it is normal for democracies to function

with dissent, not consensus The preoccupation with consensus seems to have damaged Mr. Suarez' popularity. He has become more of a faceless bureaucrat than a national leader. Associates of the premier, 45, insist that he is an inward man who feels uncomfortable with public politicking. He was trained as a bureaucrat in the Franco regime. He was schooled in working behind closed doors, and he obviously still prefers it.

Popularity Blossomed

In the 18 months after Franco's death, Mr. Suarez became an extremely popular figure. A magazine ran a cover cartoon of him dressed as Superman and Inbeled it "Suarezman." Mr. Suarez had the chance then to make himself indispensable to Spanish democracy. That would have been dangerous for democracy in a country trying to recover from four decades of personal dictatorship. But Mr. Suarez held back, and democratic institutions now have a chance to become more important than per-

There are some lingering dangers for Spanish democracy. The most obvious is the mood of the armed forces. The Francoist armed forces have grudgingly accepted reforms in the transition from dictatorship to democracy, but there have been

moments of great tension. The most recent has come over the Basques. ETA, the Basque separatist organization, has accepted the democracy of King Juan Carlos and Mr. Suarez with no more enthusiasm than it accepted the dictatorship of Franco. In fact, ETA terrorism has increased, Since last year's parliamentary elections, ETA reportedly has killed 23 per-If the rules work, Spain might sons, mostly policemen. # Chevalier, Piaf On Paris Map

PARIS, July 11 (IHT) — Paris has decided to honor two singers who lauded the French capital around the world by giving the names of Maurice Chevalier and Edith Piaf to two Paris squares, the city council announced today.

Two crossroads in the 20th Arrondissement, a working-class section of the city associated with the early lives of both entertainers, were renamed Place Maurice Chevalier and Place Edith Piaf.

They were among 42 Paris streets and squares renamed to commemorate personalities associated with the city. These also included a small square in the 6th Arrondissement named for the 20th-century composer Francis Poulenc, and a new street in the 12th Arrondissement named for the painter Vincent Van Gogh.

# Algerian Woman Allegedly Kidnapped

# Two Nations Quarrel Over Fate of the 'Stolen' Wife

By Jane M. Friedman

PARIS, July 11 (IHT) - A modher brother has become a point of contention between the governments of Canada and Algeria.

Last week, the Canadian government protested the kidnapping, which officials believe occurred on Canadian soil in April, to Algeria's foreign minister, Abdelaziz Bouteflika, asking for "justice and reparations." Since there had been nn response from Algiers, Canadian Minister of External Affairs Don Jamieson sent an emissary to Algeria last Saturday to impress upon the Algerians the importance Canada attaches to the case. The emissary has not yet met with Mr. Bouteflika While Canadian officials in Paris

insist that tension is not escalating. Prime Minister Pierre Ellintt Trudeau has implied in statements that if the woman, Mrs. Dalila Maschino, is not free to return to her hushand in Canada, relations between the twn countries could suffer.

The alleged kidnapping of Dalila Maschino, 26, by her brither, Messaoud Zeghar, 55, a close associate of President Houari Boumedienne, has become an emotional issue in Canada on the grounds of women's rights and the violation of Canada's territorial integrity.
It has also attracted attention in

France, where 150 intellectuals, including Jean-Paul Sartre and Simone de Beauvoir, have signed a peution urging Mr. Boumedienne to obtain the girl's freedom. L'Express, the French weekly newsmagazine, said in an editorial that

human rights"; French newspapers cause he possessed erotic photos of "Then you still had to be Moslem" live together as soon as one of them have made similar statements.

PARIS, July II (IHT) — A modern-day Romeo and Juliet drama involving an Algerian woman allegedly stolen from her husband by

Mrs. Maschino's husband, Denis, also 26, is a Christian of French nationality. His father, Maurice Maschino, is also French He was at one time a supporter of the Algerian regime but turned against it in the 1960s.

# The Beginning

The drama hegan on April 25 when Mrs. Maschino disappeared from her home in Montreal. According to Montreal police reports and letters that Mrs. Maschino has slipped out of her brother's home in Algeria, Mr. Zeghar hired a DC-8 jet and flew it, with an American an Algerian woman of the Moslem crew, to Montreal. About 12 family members were reportedly involved in the plot. On the night of April 24, Mrs. Maschino went to dinner with an aunt and uncle and then visited her two sisters, who also live

"I think they put something in the tea," Mrs. Maschino said later in a letter to her husband. "I was in

According to wimesses inter-viewed by police, Mrs. Maschino was taken to Dorval International Airport and the waiting DC-8 jet. She was rolled out to the plane in a wheelchair. According to press reports, the operation cost Mr. Zeghar \$150,000. Today, Mrs. Maschino is at the

country home of her brother in the hills 200 miles south of Algiers. Mr. Zeghar insists the girl asked to come home and is free to leave. A Swiss journalist, flown to the estate in El Eulma, said that Mrs. Maschinn looked happy. She reportedly said that her marriage had been a "farce" and added she had been forced to marry Mr. Maschino be-

Letters, written in English, that Mrs. Maschino has sent from El Eulma contradict this version of events. "I am in a prison," she said in one letter. She added that her brother planned to marry her to an Algerian Moslem.

While the Canadian government considers the case an affair of state. the Algiers government has maintained it is a "private affair."

The issue boils down to a battle between Canadian law and women's rights on the one hand and Algerian traditions on the an Algerian woman of the Moslem faith may not marry a foreigner who is not Moslem. Mrs. Maschino's marriage is, therefore, not recognized in Algeria. According to tradition, a single woman's life is in the hands of either her brother or her father. Mr. Zeghar had disapproved of the marriage when it took place in 1975 and had entreated his sister in return home.

"These kinds of things go on all the time in Algeria," said an Algerian inumalist. "The problem is that Zeghar did this in Canada, not in Algeria."
"Wnmen are dominated by their

fathers and brothers and most marriages are arranged," said Fadela M'Rabet, the author of two feminist books on Algerian women and the stepmother of Denis Maschinn.

Denis Maschino's father, Maurice, 47, lived through a similar ex-perience when he fell in love with Fadela M'Rabet in Algeria. The elder Mr. Maschino had been an admirer of the Algerian revolution and had renounced his French citizenship to become Algerian in 1962. He married Fadela in 1963.

to marry a Moslem women," he said in his Paris apartment, "but the conversion took three minutes." Today, these conversions are apparently frowned upon.

# Increasingly Disillusioned

Maurice Maschino and Fadela M'Rabet became increasingly disillusioned by Algeria and eventually returned to France. Mr. Maschino reclaimed his French citizenship. He writes for Le Monde and teaches in high school.

His son Denis met Dalila at school in Algiers. She was permitted to study but was always accompanied by two bodyguards. She escaped from her older brother in 1975 during a trip to Geneva and traveled by train to Paris, where she and Denis married. Later that year the couple moved to Canada, where they enrolled in universities, to be far from the woman's family. They requested Canadian citizenship.

The plight of Dalila Masching has captivated the Canadian public and her letters have been published almost in entirety.

In one recent letter, she appeared resigned to a forced remarriage. She expressed her love for her husband and hoped that they would one day meet again. She expressed the fear that his lave for her would

"We have lost today but we are young and we will win one day (if you want!," she wrote in small script. "I am always thinking of you and will lave you forever. I think there is no way to get nut of

here. I hate each of them."

"If I accept to marry" she added, "it is because I cannot live in this

will disappear. I will take my revenge one day. I just ask you to be lieve in us and not farget me."

Denis Maschino has offered to convert to Islam but to no avail. Although the Canadian government is convinced a crime was committed on its territory, it has chosen diplomatic pressure on Mr. Boumedienne rather than issuing an arrest warrant. There is an extradition treaty between Canada and Algeria and the Canadians do not want to spoil their relations with Algeria. their main African trading partner. Canadian exports to Algeria to-

taled \$175 million last year. The elder Maschino hopes that the couple will be able to meet on neutral territory where Dalila could declare her will, free from duress.

To observers, this possibility seems remote. Mr. Zeghar is a powerful man. According to reports, he owns two small American airline companies. He is a friend of David Rockefeller, owns homes in several countries and has amassed a fortune despite Algerian socialism. He has been responsible, according to reports, for Algerian arms purchases internal security and recent commercial deals such as contracts in sell Algerian natural gas to American companies.

# "Research safeguards growth and employment"

Professor Dr. Rolf Sammet chairman of the board of management of

"Our research and development will continue to generate products to meet the needs of a growing world population with increasing living standards.

I am convinced that we thereby guarantee the company's future."

# Our future lies in our research

Our confidence in Hoechst's continuing success is based on the fact that progress is being increasingly shaped by the chemical industry. More than virtually any other branch of industry, the chemical industry can offer solutions to the crucial problems of our time. We are conscious that the predominant contribution must come from new developments rather than simply from manufacturing larger quantities of existing products. This is a challenge to our researchers: to make optimum use of our scientific and technical potential and find new ways. Here lies the real basis for the growth of Hoechst, signifying the importance of research and development for our business activities.

# **High investment** in research

In 1977 the company spent over one billion Deutschmarks on research and development, approximately DM 80 million more than in the previous year. This is a substantial investment for the future, so that the company can meet the challenge of international competition tomorrow as well as today. The need for this expenditure is underlined by the fact that nearly one-third of our present sales has been achieved by products that did not even exist ten years ago. New products will continue of course to be a criterion of successful research. Equally important, however, will be the further improvement of existing products and the development of raw material and energysaving production processes. In this way we open up new business opportunities and at the same time safeguard employment and the growth of Hoechst

# Coming safely through a difficult year

1977 was a difficult year for Hoechst. After a promising start it soon became apparent that our expectations would not be fulfilled in many fields. Rising labour costs, the continued revaluation of the Deutschmark competition distortion through enterprises not operating in accordance with normal market principles and declining prices have all had a considerable effect upon our activities. However, jointly with our 180,000 employees in all parts of the world, we have faced up to these problems and overcome this difficult year.

# Dividend

The Annual General Meeting on 6th June 1978 approved a dividend to our shareholders of DM 6 per share at the nominal value of DM 50.

# Algeria Muddles **Intentions With**

U.S. Gas Firms NEW YORK, July 11 (AP-DJ) -Algeria might not have canceled contracts to sell El Paso Co. and Tenneco Inc. large quantities of natural gas as previously indicated in official Algerian announce-

The conclusion that the contracts had been canceled sprang from confusing language — apparently deliberately so — in an announcedeliberately so — in an announce-ment by Algeria last week concern-ing an agreement with West Ger-many. In announcing approval to deliver of 13.5 billion cubic feet of gas a year each to two West Ger-man power distributors, the official Algerian News Agency said the pacts were approved because of U.S. government delays on Algerian gas agreements with El Paso and

The news agency's announcement cited the passing of the Dec. 31, 1977, deadline that the Algerian government had agreed to for U.S. approvals. The announcement also said that Sonatrach, Algeria's national oil and gas company, "conse-quently decided to place the gas thus made available on other markers. The report added that Sonatrach was also negotiating to sell large volumes of gas to France, Sweden, Austria, Tunisia and Yugoslavia.

Under the pending U.S. contracts, originally subject to cancellation by Algeria if they were not approved by Sept. 30, 1977, later extended to Dec. 31, both companies are to receive about 350 million cubic feet of gas a year over 20

Both El Paso and Tenneco are also assuming that the contracts are still in effect. Spokesmen for both companies said yesterday that they are still awaiting approvals of the

Energy Department. There were also new indications yesterday that the Algerians still hope to salvage both projects. An official of Sonatrach, reached in Algiers, would not comment on whether Algeria would be able to sell to both the U.S. and West German customers. Nor would be comment on what, if anything, Sonatrach has said to the U.S. compa-nies. He did say, however: "Ask (Energy Secretary James) Schlesinger when" the U.S. government will rule on the contracts.

# **Brazil Gets Steel Loan**

TOKYO, July 11 (Renters) — A signed to be dirable, unlike the Japanese banking syndicate said to-day it is prepared to finance a steel has shed several currencies includproject with a \$700-million, 12-year

Banking sources said Siderbras, the state-run steel plant's bolding company, will build a mill at Tubarao in partnersbip with Kawasaki Steel and Finsider of Italy, with an annual capacity of six million tons to come on stream in

They said the proposed loan will be subject to negonations on terms, with interest based on Eurodollar market rates and lenders' option to provide about 10 percent of the funds in yen.

# Algeria Borrows

It noted, however, that ship—coupon of three-quarters of a point ments of manufactured goods, par—over the London interbank offered over the London interbank offered conditioners, have been increasing at a faster pace leading to a decline in inventories.

However, other "exotic" rowers have seen the price of their loans drop to sharp discounts in the secondary market due to their insistence on differentiating the quality of their loans against those from prime banks only by the size of the minimum coupon offered. In this respect the Algerian state-owned bank has also set terms designed to appeal to lenders, guaranteeing a minimum coupon of 8th percent on this eight-year loan.

Another borrower, Sonitex, Algeria's state-owned textile industry group, has arranged a \$20-million, seven-year syndicated bank loan at a spread of 1½ points over the London interbank offered rate.

# **Netherlands Cancels** Four Nations' Debts

GENEVA, July 11 (AP-DJ) — The Netherlands is waiving all elaims for repayment of some \$130 million owed to it by four of the poorest developing countries, the government said today. Bangladesh, Sudan, Tanzania and Upper Volta are the four con-

cerned, Duich delegate H. Schelte-ma told the annual summer meeting of the United Nation's Economic and Social Council bere yesterday. The Netherlands is one of a group of Western countries that already decided to cancel or soften outstanding loans.

and morally unfair" manner in which some EEC institutions function and specifically mentioned the common agriculture policy and the relative sharing out of EEC's de-

Although Britain ranks about seventh in per-capita income in the EEC, it is the second largest contributor to the EEC after West Germany, mainly through the workings of the common agriculnoted, Denmark, which has the highest EEC per-capita income, derives a net financial benefit from

community mechanisms.

Mr. Healey's reaction to the Bremen summit contrasted somewbat with a spate of press reports suggesting general British unhappi-ness with the Franco-German monetary initiative.

"I very much welcomed the con-

clusions at Bremen." Mr. Healey said, noting that with the inclusion of resource transfers in the overall package, all of the points Britain feels are essential to a viable new monetary arrangement bave been broadly agreed upon in principle.

Mr. Healey listed the other

• The new system must be designed so that it reduces constraints on economic growth rather than increasing them, in contrast to the ex-perience under a regime of floating currencies.

 The new system must be deing sterling and the French franc twice during its existance. All countries that join the new arrangment must be assured that they will be able to remain within it.

 The balance-of-payments adjustment process within the new arrangement must be characterized by "symetrical" obligations be-tween surplus and deficit countries. The new arrangement should

operate in a way that does not weaken the dollar "or the yen." Adequate amounts of funds for intervention must be available

on "suitable" terms. Resolving the details of those points and the details of resource rakis, July 11 (IHT) — "I'm very keen that we should in fact solve them," Mr. Healey said. He said the plan put forward at ing-rate bond issue carrying a coupon of three-quarters of a policy." transfers will bring problems, but new currency arrangement. Rather, it is a starting point for talks among EEC finance ministers.

# Dollar Higher. **Trade Moderate**

LONDON, July 11 (AP-DJ) -The dollar rose against major cur-rencies in moderate trading today as banks and corporations liquidat-ed positions ahead of this weekend's summit meeting in Bonn.

The dollar rose to 202.90 yen from 201.25 Monday and 202.25 Friday. Dealers attributed the gain mainly to profit-taking on the yen's sharp advance ahead of the Bonn

Sterling fell to \$1.8846 from \$1.8915 after yesterday's rise of nearly two cents on speculation that British Petroleum had made a major oil find off the Sbetland coast. However, questions have been raised as to whether the oil would be commercially exploitable, even if a large discovery is con-

In trading for continental curren-cies, the dollar's gain corresponded to roughly half of yesterday's steep decline. The dollar rose to 2.05 Deutsche marks from 2.0420 DM yesterday and 2.0575 Friday. It rose to 1.8132 Swiss francs from 1.8040 and to 4.4515 French francs

**Greek Oil Tests Positive** ATHENS, July 11 (Reuters) -Oil drilling tests off the Aegean is-land of Thassos are encouraging and suggest production potential of 12,000 to 13,000 barrels a day, Miltiades Evert, Minister of Industry and Energy, said today.

# **Despite Slower Growth**

# U.S. Recession Doubted By Congressional Aide

WASHINGTON, July 11 (AP-DJ) - The U.S. economy faces continuing trouble despite a drop in unemployment but probably will not slide into recession, Alice Rivlin, director of the congressional Budget Office said today.

She told the Budget Committee the outlook for inflation has worsened from earlier projections and slower economic growth seems to be in the cards through 1979.

"This is a difficult call, but given our policy assumptions, the Budget Office does not believe that current economic trends point to a recession," she noted.

### Policy Assumptions

The policy assumptions include a tax cut of about \$15 billion, with some stimulus for business investment and a Federal Reserve policy that would not permit much more of an increase in short-

term interest rates nor squeeze down credit too sharply. She said Budget Office specialists expect economic activity to grow at a rate of 3.5 percent to 4.5 percent during 1978 but think that economic growth will slow by about half a percentage point during 1979. By the end of that year, unemployment would range

between 5.2 and 6 percent from June's 5.7-percent level.

The most unpleasant side of this scenario is the outlook for prices," she said, predicting a 6.8-to-7.8-percent rise in the consumer price index for 1978. "substantially above the 6.6-percent rise

Prices will continue to rise rapidly during 1979, she said, though probably not at the steep 1978 rate.

# **Xerox Monopoly Ruled Illegal**

By Robert E. Tomasson HARTFORD, Conn., July 11 (NYT) — A U.S. federal jury said vesterday that the Xerox had maintained an illegal monopoly of plainpaper copying machines, but it ap-

parently reduced sharply the

amount of damages likely to be won hy the SCM Corp. in its long anutrust action against Xerox.
The decisions, involving 24 no and ves verdicts on 49 separate questions, appeared to joli both sides. SCM lost an important point in its argument for the bulk of the triple damages that could have amounted to \$1.52 billion, while Xerox remained open to the possi-

hility of other severe penalues for maintaining an illegal monopoly.

Sources said that in light of the jury's ruling it appeared that SCM now would be able to recover about \$225 million in damages plus attor-

nevs fees.
While answering yes to the charge that Nerox maintained a monopoly, the jury then answered no to the question: "As of January 1964, did SCM have the intention, preparedness and capability to enter the development, manufactur-ing and marketing of plain-paper

### office copiers?" Longest Trial

The verdicts, which took almost an hour to read by U.S. District Judge Jon Newman, came on the 27th day of deliberations in the trial that began June 20, 1977, making it the longest jury trial ever in fed-

eral courts. The lawsuit also is believed to involve the most costly litigation ever waged between two corporations. The two sides, with legal teams of more than 200 persons from eight law firms in New York. Chicago, Boston. New Haven and Stamford, Conn., had spent well in excess of \$60 million by the time the case

went to the jury, according to esti-mates from several sources. After the opposing sides had reviewed the verdicts today, the jury was to later hear tesumony on the amount of damages to be awarded to SCM, after which Judge Newman will rule on the complex areas of law involving violations of the Sherman and Clayton Antitrust

Stanley Robinson, chief counsel

# U.S. Jury Cuts SCM's Damages

for Xerox, while acknowledging that the verdicts had established his company's maintenance of an illegal monopoly, pointed out one question in which the jury bad accepted a crucial defense point of Xerox. When asked if SCM could have avoided any damages resulting from its exclusion from the copier field by simply filing suit earlier. the jury responded "yes."

Sanctions Against Xerox

While the amount of damages that SCM can recover appears to be sharply reduced, Judge Newman will presumably have the power at a later date to invoke other sanc-tions against Nerox because of the ruling that it had maintained an

illegal monopoly.

While the jury acted to restrict the scope of the SCM claims, it concluded that Nerox maintained an illegal monopoly as of 1969 — the year SCM claimed it would

have started to show a profit in its copying division if it had been able to obtain Xerox patents through a

licensing agreement. SCM charged in its suit, filed in 1973, that Xerox ltad created a monopoly by refusing to license the paients it had acquired with the inient to exclude competition and

thereby control prices Xerox created, SCM alleged, a "patent thicket," acquiring some 1.700 patents and using just a few of them while the rest were kept

inactive. Monday, Richard Sexton, vice president and general counsel of SCM, argued that "the jury sustained basic SCM claims that Xerox had bought up and tied up plain-paper copying patents, mono-polizing the whole industry." But that point, as well as others, re-

mains to be reviewed today. Nerox had countered that its preeminence in the plain-paper copying market has been the result of superior inventiveness and market-ing practices and that SCM's difficulty in the field had been due to husiness ineptness rather than any Nerox blocking tactics.

# Big Board Prices Higher

NEW YORK, July 11 (Reuters) Prices on the New York Stock Exchange rose sharply in early trading today on rumors that oil was discovered in the Baltimore

Canyon, analysts said, but later gave up some of their gains. The Dow Jones industrial aver-age gained 4.50 to 821.29 after being up seven points earlier in the session, Advances led declines 942to-526 and volume rose to 27,48 million shares from 22,47 million

yesterday. Late in the session, the Commerce Department reported U.S. retail sales rose \$33 million, or less that 0.1 percent to a seasonally adjusted \$63.96 billion in June, up 10.6 percent from a year earlier and compared with a decline of \$152

million, or 0.2 percent in May.
On the American Stock Exchange, prices rose with the market-value index gaining 0.78 to 147.48 and the average price per share up nine cents.

The rumor of an oil find centered

on Texaco, which is drilling about 100 miles east of Atlantic City, not far from where Shell Oil yesterday reported a dry hole. Texaco said however that it could not comment on whether it found oil or gas, adding: "Unless we discovered signifi-cant hydrocarbons, we wouldn't

comment, Texaco climbed 1's to 24's in very heavy trading and Freeport Minerals, which has a 10-percent interest in Texaco's block, added

1 's to 25's. In Chicago, soybeans, wheat and corn closed higher and oats were lower on the Board of Trade, However, late in the day, the Agriculture Department lowered its

forecast of the winter wheat crop this year to 1.28 billion bushels from its previous estimate of 1.31 hillion hushels and compared with 1.53 hillion hushels last year. The department said the corn crop should be 6.15 billion hushels compared with 1977's record 6.36 hil-

# APICORP

The Corporation provides equity and loan finance for oil, gas and petroleum-related projects and industries in the Arab world.

It was established at the end of 1975 by Saudi Arabia, Kuwait, United Arab Emirates, Libya, Iraq, Qatar, Algeria, Bahrain, Egypt and Syria, the members of the Organisation of Arab Petroleum Exporting Countries (OAPEC).

Paid-up capital at the end of 1977 was Saudi Riyals 1,200 million (US \$346 million) and net assets exceed Saudi Riyals 1,300 million (US \$375 million).

In the year ending 31st December, 1977, total income was Saudi Riyals 53.0 million (1976: 30.9 million). Net profit for the year was Saudi Riyals 41.8 million (1976: 26.6 million).

### SET IN MOTION

By Valerte Martia, Farrar, Straus & Giroux, 210 pp. \$8.95

Reviewed by Anatole Broyard

HELENE, the narrator of "Set in Motion," is walking down the street with Richard, the husband of her closest friend. Although she has run into him acci-dently, she says. "I sensed that he was up to something." And of course he is. Everybody, everywhere, is up to something, and it is this that I often miss in modern fiction. It sometimes seems, in the

no one is up to anything. Miss Martin even seems to know what people are up to. While I think that by now I would have setiled for an author who simply recognized the fact that people are scheming, striving and swealing with intention, it is still more satisfying to find one who actually knows, and tells me, what it is that they are crying to do.

Now, you might suppose that she

novels and short stories I read, that

arrived at her insight into people by oversimplifying them, by giving them obvious things to do. On the contrary: Her characters seem to have passed beyond disillusionment into a deeper stratum of behavior. They don't fool around. When Helene asks Richard's wife Maggie whether she loves him, Maggie answers: "I'm determined to." When she warns Maggie that Richard is crazy and asks why she stays with him, Maggie says "I want to see what's going to

happen."
Maggie has another reason in reserve. In spite of his dangerous madness, she still loves Richard. This will seem surprising until you stop to think about it and check it against your own observation of other people. Maggie puts it very well: "When I found out that there were things about him that I didn't . . things I couldn't love, it didn't change anything . . It just makes it all so much more diffi-

Richard loves not Maggie, but Helene because, as he puts it, "she is never fully conscious." seems to come as a relief to him. and I can see how it might, even if he were not already overwrought. Too much consciousness may be. for some people, the death of love. As it is, Richard seems to see Helene as someone who is thrillingly unfinished. He wants to compicte her so that he too can see what's going to happen. Don't we all want to see what's going to hap-pen? And don't some of us suffer from the melantcholy presentiment that it already has, that we have arrived after the climax of things? Speaking of Helenc's passivity,

Richard says that people in love don't have any faults for one another." because they are one another's faults. When Richard is finally committed to a mental hospital. Helene visits him and toes to give him what he wants, not because she loves him, but because she helieves in saving people. Though she has never allowed Richard to touch her befure, they emhrace passionately in the doctor's office until the attendants rush in and separate them. It is a beautiful scene and I felt that Helene might actually have succed-Helene might actually have succeded in bringing him back into the world.

Helene's passivity affects Michael, too. He is also married to one of her close friends, and I wonder whether sleeping with the wives or husbands of one's close friends isn't a contemporary substitute for incest. Michael is the sort of man

Solution to Previous Puzzle

who likes to knock the heads off flowers with a stick. Beauty minding its own business irritates him as if he were a factory foreman who felt that beauty should have a full production schedule.

Miss Martin has a fine ear for the cruel, cold lines that such men reserve for women. When Helene says that she was surprised to see him arrive in a red car, Michael asks, as if he is disgusted by the extent of her interest in him: "You tried to imagine what kind of car i

While Miss Martin knows how to cui through the fat, this has not made her book thin and self-con-sclous as some acute books are. She writes as if she felt that, now that we know the worst about ourselves: we might as well sit back and enjoy it. I enjoyed "Set in Motion," an you probably will too.

Anutole Broyard is a book reviewer for The New York Times.

WASHINGTON, July 11 (AP) The blue chiffon gown worn by first lady Rosalynn Carter to balls celebrating her husband's inaugura-tion as president in 1977 and in 1971, as governor of Georgia, wil be presented to the Smithsoniar Institution, the White House has announced.

Mrs. Carter will take part in the ceremony July 20 at the Smithson; an National Museum of History

and Technology.

The dress will be placed in the rirst Ladies' Hall, which contains i gown from the wardrobe of every first lady in U.S. history.

# BRIDGE

West opened four spades on the diagramed deal. But South, naturally, tried five clubs, which East was happy to double. It might seem that South was headed for a twotrick defeat, being two hearts and one trick in each minor suit, but South got the hetter of East.

A heart lead would have been best as it happened, but West naturally led the spade king. South ruffed and led the diamond ace. noting the appearance of the jack on his left. He then led the club queen, and East ducked, trying to keep South from reaching the dum-

playing the king and another to give last a trick with the queen. CQ72

WEST (D)

AKJ 1065 42

PA786 East returned his last diamoind. trying to preserve the spade nine as an exit card, but South took it away from him. He ruffed his own diamond trick in the dummy and ruffed a spade.

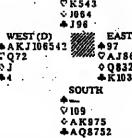

This left hast with nothing but hearts and clubs. South easied the ding: club are and played his last dia- west mond, has refused to ruff, but it 44 did not help him. After a framp lead, he was forced to lead a heart. Pass allowing the king to score in the

dummy. A one-trick defeat gave

By Alan Truscott

South nearly all the match point on the deal. Notice that it would not have helped East to take the club queet with the king. If he had then re-turned a spade, for example, South would have ruffed and draw

trumps, ending in the dummy. diamond finesse would then have led to a similar end play when East won the fourth mund of diamonds NORTH **♦Q83** ♥K543 **♣** 196

Both sides were vulnerable. The bid-t

# Baseball's All-Star Game: The Greatest Spectacle

By Joseph Durso

NEW YORK, July 11 (NYT) -It is only an exhibition game, hut it has been advertised, publicized and glamorized into the most splashy exhibition game in sports. Most of all, it has become a giant of sports marketiog.

The midsummer night's dream of the hig leagues, tonight in San Diego, was expected to be staged before a full house of 50,000 people who paid \$15 apiece for a box seat and \$10 for a reserved seat. The festivities were to be beamed across the United States to maybe 50 million television viewers and 26 million radio listeners and, by earth satellite, to Europe, Latin America and Japan.

This is the 49th All-Star Game in a series that started in 1933 in Chicago. Why does it outrank the 2.106 games played during the reg-ular baseball season as well as the all-star games in basketball and hockey and the Pro Bowl game in

# A Matter of Timing

"It's a great spectacle," said Marvin Miller, the economist who serves as executive director of the Major League Baseball Players Association. "Compared to other sports, this is a far-greater spectable as viewed by the people.

"In football, they wait until the season is over, so their timing isn't so good — the game is anticlimactic. In basketball, since the leagues merged it's essentially an East-West game, with no traditional rivalry. But baseball has two leagues, a midseason date and a long tradi-

So now baseball owns a lavish "special" that is all things to all people, to wit:

• To the lords of baseball, it is "the most exciting night of the year" and "the largest nonpolitical election in the United States," referring to the more than 12 million ballots cast hy fans to select the

 To the National League, which has won 29 games and lost 18, with one tie, it is a sign of superiority. To the American League, which has lost six straight games and 14 of the last 15, it is a source of embarrassment and, lately, a

• To the public, it is a lift in the middle of the six-month season; to the host city, a business lift in the middle of the summer slump.

### Always the Showman

It is no longer a country boy's fantasy that began with Babe Ruth's home run to win the opening game, 4-2. Now, despite the sa-juration of televised "Games of the Week," playoffs and World Series, it is a kind of supershow on an otherwise slow evening in July.

Even the Players Association, the baseball union, finds it an extraordinary event, despite the fact that the All-Stars themselves draw no pay for the game. Instead, they get travel expenses, a gift of silverware or some other thing suitable for the home, and a free trip for one guest

"The All-Star Game used to feed money directly into the players' pension package," Miller said. Ninety-live percent of the gate receipts and 60 percent of the radio-TV revenue went into pensions, down to the last nickel. In 1967 that was changed. Now the 26 clubs pool certain revenues into a Central Fund — money from the playoffs, World Series and All-Star Game — and they pay \$8.3 million a year from that fund into players'

"This game alone is probably Ron Guidry of the New York worth a million dollars. But whether it draws 30,000 people or Yankees signs autographs for fans at a workout in San Di-50,000, it has no direct impact on ego for the All-Star Game. the players' pensions.

It appears (if you will forgive the cautionary qualification) that Mac-Leod and Scotland are reunited, ready to "murder" the opposition once more, even if his terms of refcrence seem rather like sending out Niki Lauda with orders to survey the race course before stepping into the car and to do what be can to keep a temperamental car on the road. One's own response to the. showman that was Ally MacLeod was suspicious from the outset: it was justified, yet in the heart of the storm in Cordoba, there developed a buman sympathy not only for a man who appeared to be led to the gallows, but also for his ability to

# Tottenham Gets Villa, Ardiles Of Argentina

BUENOS AIRES, July 11 (Reuters) — Ricardo Villa and Osvaldo Ardiles, two key members of the victorious Argentine team in the World Cup soccer tournament, have been transferred to the English club Tottenham Hotspur for \$370,000

here last night by Tottenham's manager, Keith Burkishaw, and the presidents of the two players' local clubs, Racing and Huracan. Villa of Racing and Ardiles of

The transfer was announced

Huracan, both 25-year-old mid-field players, signed three-year contracts and will leave here for London on Saturday. They will be the first foreign-

ers to play league soccer in England since the law there was changed last month. Previously foreign players who had lived less than two years in Britain were barred from professional football there. Burkishaw said Villa and Ar-

diles would be included in the Tottenham team that will start a pre-season tour of Ireland, the Netherlands, Belgium and Scotland on Aug. 5. Officials of Racing and Huva-

can said their clubs would each receive \$370,000 from Tottenham for the transfer. In addition. Tottenham will pay promoters' fees, social security and other related items for both players amounting to about \$130,000 each.

Tottenham was promoted back to division one at the end of last season, after being relegated the previous year.

# The man was quizzed for part of look interrogators in the eye and

was sacked, unjustifiably, was Jimmy Armfield of Leeds United, A quiet gentleman. Jim was once de-scribed by players as a man whose indecision is final. It was unfair. He took over at Leeds immediately afler Brian Clough had been sacked comment. after 44 days of turmoil in which Clough blasted the most successful Or So It Seems club in Britain apart at the seams.

Armfield worked quietly and stealthily, replacing old worn parts with new, stripping off the overbelligerent, cheating edge the team displayed under Don Revie, and replacing it with sheer creative soccer. I, for one, thought he was almost there last year and, despite a crippling injury list, his team im-ished ninth in the championship.

subdued side remain.

# No Despair for Future

His forte was patience: patience with sourcd players, patience with aging men who turned on him because they knew their days were over. He weeded them out, cautiously in his fashion, but, when Leeds informed his that his own day was done, he could only say: "1 know I can make a living. My wife works, my two boys are planning their careers, I've been trained as a journalist and I can write. I might even get some of my poetry pub-

lished now."

Sheer poetry, the Leeds club itself: Days after sacking Armfield, the directors published an advertisement asking for top managers to apply for the post in "strictest confidence." At the same time, they sprung a leak, virtually offering the job publicly to Lawrie McMenemy, the Southhampton manager who is holidaying in America but who has just been tied to a long-term contract after lifting

complete the cycle, Revie is apparently still connected with Leeds, as a "consultant." One wonders what his word would be if Jack Charlton, the former England center-half who criticized the defection of Revie to the Arab oil barrels, should apply, confidentially, to manage his old

# Players Disagree With the Fans' Choices

By Gerald Eskenazi

NEW YORK, July 11 (NYT) -If the baseball players, and not the fans, had picked the starters for tonight's All-Star Game, half the 16 players chosen would have heen left out, a poll by The New York

The American League players disagreed most with the fans, put-ting different starters at five of the eight positions. In the National eague there were differences at

In the poll, which was conducted last week, each major league baseball player received a questionnaire that asked him to select, anonymously, an All-Star team for his

# Yankees Snub Jackson

In addition to the frequency with which the fans and the players disagreed, there were some other remarkable results, including these:

If, like pheonix, he rises, may the • The New York Yankees' Reg-gie Jackson, who was voted to the Meanwhile, one manager who starting American League outfield by the fans, received votes from only twn of the 10 Yankees who responded to the poll. (Although the ballots were anonymous, they were collected by the team.) His teammates preferred Jim Rice, Larry

Evans. In the overall player balloting Jackson was sixth among the league's outlielders, beaten by Rice, Lynn, Hisle, Richie Zisk and Evans, in that order.

Of the four Cincinnati Reds

voted to the National League's starting team, only two — George Foster and Pete Rose — were se-lected by the players. The Reds' Johnny Bench, who has been injured a large part of this season but who was nonetheless the fans' selection for catcher, was easily beaten in the player halloting, 144-23, by the St. Louis Cardinals' Ted Simmons. (Simmons wound up fourth in the voting hy the fans.) And the Reds' Joe Morgan, a start-er at second base tonight, was far behind Dave Lopes of the Los An-

geles Dodgers in the player poll.

• The Dodgers' Rick Monday, in the public's view one of the top three National League outfielders,

# Bears Lose Patulski

CHICAGO, July 11 (AP) - Walt Patulski, a Chicago Bears defensive end, has undergone surgery for a slipped disc and will miss the 1978 season, the Bears announced. Patulski, 28, signed with the Bears as a free agent after he played the 1977 National Football League scaDon Money of the Milwaukee

Brewers, the starting second base-man for the American League, received only one vote from among the 196 players in his league who responded. Much of the reason, no doubt, was that Money of late has not even played second base, the position for which he was listed on the fans' computer ballots, which were prepared well in advance. In fact, Money, who has been at first base, was outpolled at second in the player voting by a rookie team-mate, Paul Molitor. Frank White of the Kansas City Royals was on top. **60 Percent Response** 

Three hundred eighty-two, about 60 percent, of the 650 players in the major leagues responded to the

The voting for the actual starters was done by more than 12 million fans - or at least by fans voting more than 12 million times - who were allowed to choose eight play-ers in each league, with the selec-tion of pitchers and reserves left to Billy Martin of the Yankees and Tom Lasorda of the Dodgers, the managers. The Times poll, going a hit beyond the fan balloting, asked each player to select in addition the

# Jackson Out

# With a Fever SAN DIEGO, July 11 (AP) -Outfielder Reggie Jackson of the New York Yankees pulled

out of the All-Star Game yesterday because of what he described as a high fever and will be replaced as a starter in center field by Fred Lynn of the Boston Red Sox.

The American League mana-ger, Billy Martin, replaced Jack-son on the roster with Graig Nettles. Earlier yesterday, Martin named Boston second haseman Jerry Remy to the team, replacing his teammate, shortstop Rick Burleson, who injured a font in a slide Sunday. Burleson was on crutches and expected to be out of action for about 10

days.
Two other American League stars — New York catcher Thurman Munson and Boston outfielder Carl Yastrzemski also pulled out of the game because of injuries. Munson was replaced by Kansas City catcher Darrell Porter and Yastrzemski hy Boston outfielder Dwighl

The only National League replacement was Atlanta catcher Biff Pocoroba, named for the ailing Johnny Bench of the Cin-

Bernard Hinault is cheered on in the Pyrenees.

# Hinault Nears Tour Lead

Southhampton to division one.

McMenemy, an old friend of the departed Revie, was a name ignored by Leeds when Revie himself offered a list of successors before the club for his ill-fated term two minutes and the overall leader. Although he still wears the lead-

er's yellow jersey, Bruyere's 10th-place finish today left him little more than a minute ahead of Martinez, a well-regarded climber, was one of a handful of riders to stage a breakaway over the moun-tains from Pau. He beat Hinault

and Michel Pollentier by five sec-onds in a sprinting finish. Also among the leading finishers were two other favorites, Joop Zoetemelk and Hennie Kunper. They, Bruyere, Hinault and Pollentier have now emerged as the men to beat in the mountain stages, which continue for a week. The Tour de France ends July 23.

The race was marked by the ex-pected withdrawal of Bernard Thevenet, the winner last year and in 1975. Ill and out of form, Thevenet

# Austin Honored

NEW YORK, July 11 (AP) -Tracy Austin, 15, who won Wimbledon's junior title last week, will be a member of the 1978 Jun-ior Wightman Cup team, the U.S. Tennis Association said.

SAINT-LARY-SOULAN, showed great fatigue yesterday and said he was "exhausted" when he dropped out near the halfway mark today.

Complaining that he was unable to breathe properly. Thevenet said, "I don't want to die nn a bike. I should not even have started this race." The Tour began June 29 and passed along flat country until yes-

# Auerbach Looks At Other Offers

BOSTON, July 11 (AP) - Red Auerbach said today he would negotiate with the New York Knicks and another, unidentified National Baskethall Association team while he considered an offer by the new Boston Celtics owner, John Brown, to remain as president and general manager of the franchise.

Auerbach, Brown and Brown's silent partner, Harry Mangurian, held a news conference at which the 60-year-old Auerbach refused to say whether, or when, he would decide his future. Brown said he wanted Auerbach to stay and would give him at least two weeks to decide.

"As of now, I'm paid and em-ployed by the Celtics," said Auerbach, sitting between the new Celtics owners, who swapped NBA franchises with Irv Levin.

# At the Track, They Remember Burch last hole and I had a putt only this

By Red Smith

NEW YORK, July 11 (NYT) -At Belmont Park a man said to El-liott Burch, "I read about your father's death in The Blood-Horse. He was one of the nicest men I ever knew." Quietly, Ellion agreed. Preston Burch saddled his first winner at Gravesend in 1903 and - except when he was an ambu-lance driver in France before the United States got into World War I
— never was far away from horses
until be died at 93. His book,
"Training Thoroughbred Horses,"
probahly is the most widely read work on the subject.

Both Preston Burch and his father, William Burch, are in racing's Hall of Fame. Preston's uncle, Green Morris, and brother, uncle, Green Morris, and brother, Selby Burch, were successful trainers. So it probably figured on breeding alone that Elliott Burch would wind up training for Alfred Vanderbilt and Sonny Whitney in spite of his father's efforts to steer him away from the racetrack. "In the 1920s." Phil Bieber writes, "Preston was training for George Wingfield's Nevada Stock Farm then racing in Hot Springs, Ark. Purses were only \$400 but the weather was exquisite and accom-

weather was exquisite and accommodations pleasant. Most beautiful mornings after training hours, Preston Burch, Hollie Hughes and my brother Isador would hike the four miles back to the hotel. They found it so exhilarating they determined to come back every year, not one ever returned.

# An Added Starter

"One evening they gathered for dinner with an added starter named Chris Blodgett, a fine-looking fel-low who spoke with a soft Southern drawl. He was an nnbelievahly good golfer who specialized in setting up wealthy marks, playing dismally and losing moderate bets. Then when his handicap and the bets had soared, he would still play like a duh but contrive to squeeze through by a stroke, saving the marks for future plucking.

"The day this con merchant joined the horsemen for dinner they had, unknown to one another, one thing in common: they were all flat broke and all confident that somebody else would grab the check.

"The dinner was excellent and everyone was enjoying the story of Blodgett's latest adventure on the golf course. While he was telling it, the waiter showed up behind him with the check. At my hrother's surreptitions signal, he laid the bill on Blodgett's plate. Blodgett went right on with his tale. "It was the long to win. As I started my stroke, a bee lit on my cheek. I jerked my head, just skinned the ball, and it bounded from here" - he plucked the check off his plate - "to there." The tab dropped in front of

# Payment Deferred

"Everybody howled. 'I'll take care of this,' Preston said when the laughter subsided. 'Chris must have kept that bee to put the sting on us.

It was worth every penny. With
that magical laugh of his, he called
the manager and arranged to have

payment postponed.
In those days bookmaking was permitted at the New York tracks. For betting purposes, a horse was considered a starter when he left the paddock, even if he was injured on the way to the post. Sometimes a player might decide that a shortpriced horse wasn't going to win. By offering better odds, he could attract bets from the bookmakers who, having booked the horse at a

lower price, were glad to hedge.
"One day Pres Burch saddled a 2-to-5 shot named Rose Tree. As she left the paddock I noticed that she was sweating quite a hit and taking short steps. This convinced me that she was hurting. Knowing Preston for a top trainer, I told him what I had seen. 'I saw it too, Phil,' he said. 'She was okay when she came into the paddock. When she started out I saw she wasn't right but it was too late to do anything." "In the betting ring I started lay-ing Rose Tree with the books, giv-ing 3-to-5, 4-to-5, 9-to-10.

# Not Ouite a Cinch

Harry Fink, a player, price-maker and sometimes layer, called to me: 'Phil, what the hell are you doing? This mare is a cinch." explained, and he strode through the ring making some large transac-

"Rose Tree finished last. Next morning Pres told me a pebble had lodged in the frog of a foot, causing pain. That afternoon the stewards called me up to ask about the commotion in the betting ring. I told what had happened. They talked to Pres Burch, his jockey, Buddy Hanford, and Harry Fink. They didn't like Fink and told him they'd be pleased if he left New York hut they were satisfied with the explanations of Hanford and Pres

Burch\_ "I could tell you a lot more about Preston Burch, who Hollie Hughes called a guy with class all

More than 25 years ago, Joe Palmer described Preston Burch as "a spare, slightly graying man, soft in speech, easy in manner, quiet in humor." One can hear him still:
"Like my daddy used to say.
Somebody'd ask, 'Kin your borse go a mile and a half, Mr. Burch?'
'He kin if you give him time
enough,' my daddy would say."

# Forego, Top U.S. Horse Three Times, Is Retired

# Advice on Lawyers

NEW YORK — Here are all which a failed son bad a lawyer these distressed letters from raising him right. rather than angry. A few days ago in this space, I published the Guiding Principles for the Conduct of Life and naturally included a precept which, one would suppose. even children follow intuitively.

'Avoid lawyers, it advised, uoder almost all circumstances.

In justice to all lawyers who felt maliciously slandered, let me assure members of the profession that there was no sucb intent. I like lawyers. Some of

my best friends are lawyers.

If a sister asked whether I minded her marrying a lawyer, my an-swer would be. "Certainly not, particularly if he is a successful tawyer." If he was not, I might urge her to consider a dentist before doing anything irreversible, but not because I believe discounts on first thing about legal process and bridge work are intrinsically more will undertake to enlighten me. at valuable than free interpretations of the Constitution.

Baker

It is simply that if things came to divorce, her lawyer would be able to obtain more alimony from a dentist than from an unsuccessful lawyer. Brothers have to consider unpleasant possibilities like this when sisters ask for advice.

I should add that no sister has ever asked my advice about whom she should marry. Why, you may ask, should I add such personal information? To make a record in case I am hauled into court, that's

wby.
It is not inconceivable that some lawyer reading these very words has once asked for the hand of a sister of mine in marriage and been rejected. If so, it is not inconceivable that this jilted lawyer might sue me, using the words above as evidence that I committed willful

Automatic and portable for use anywhere, the Mark IX-P

(212) 682-4637 **COMMUNICATION CONTROL SYSTEMS**

raising him right.

If the courts are going to let poor old parents be tied up at law for "malparenting." it is entirely possible that lawyers may also start "malbrotherine" suits against peo-ple like me. Apparently, the only people left who can't be sued at the drop of a writ are judges who order unpleasant things done upon more or less helpless people.

This, at least, is what the Supreme Court ruled not long ago when a woman who had been steri-lized by court order as a child tried to sue the judge who ordered her sterilization. Not being judges, most of us have to watch our steps. For this reason, I want to make the record right here: No sister bas ever asked me for marriage advice con-cerning anyone, includiog lawyers.

I set down these words with great timidity, for I know that lawyers who read them will oote immediately that I do not understand the great length. Lawyers are always undertaking to enlighten people. This is one reason I am so food of them as a class.

Professions like medicine and trades like journalism and carpeo try know that people do oot under stand the first thing about their mysteries, and their practitioners rarely bolber to try enlightening the layman. Lawyers, by contrast, are usually gregarious, friendly to a fault and anxious to share the wonders of their business with the most doltisb clod.

They will explain to me bow of the matter. If two undertake the larity and mesmerize scientists with explaining, they will disagree about the facts of the matter. If 20 do the job, they will end by ignoring me

damage to his personal life.

Whether such a suit is possible in law I do oot know, but it is best to act on the assumption that once you fall into a lawyer's line of vision anything is possible. Not long are the store and act on exist and maybe they are charming society and, as society, delightful company. The you fall into a lawyer's line of vision anything is possible. Not long are the store and maybe they are the considerable time in wind tuncels and laboratories. Early in this decarded the U.S. Navy spent four years and \$375,000 tossing disks fashioned after Frisbees off a 1.000-foot cliff in Utah to research their you do not exist and maybe they possible military uses. It was hoped as the disks would accorded a chapter of the disks would accorded as chapter.

L ONDON (IHT) — There has been much talk in London about inefficient management, talk which company managers not surprisingly deny. But written evidence has come to hand in a book by Nicolas Ferguson and Maire O'Reilly called "English Telephone Conversations." It is intended to aid foreign students of English but is in fact a startling revelation of total scattiness at

MARY BLUME

the executive level. Take converstion No. 1. io which a businessman named Bill Watkins tries to call Mr. Henry Chalmers, a bigwig at the International Bank Corporation. Oo Fridays, the booklet explains. Mr. Chalmers plays golf all day: "If you telephone that day, the operator always says he's very busy and can't

Bill Watkins has the misfortune not only to call on a Friday but to forget whom he is calling. He keeps asking for Mr. Childers.
Once this is straightened out he is put on
hold, innocently unaware that Mr. Chalmers
is off belting them down the fairway. When his arm is numb, be bangs up, calls back and is told that Mr. Chalmers is in a meeting. Then that he is out to lunch. Then that the bank has closed for the weekend.

More Successful

By dusk Bill Watkins has actually succeeded in getting Mr. Chalmers' home number. But he is cut off. Rotten luck, Bill, and perhaps rotten luck for International Bank Corporation as well. John Laing, the star of dialogue No. 2, is more successful. He is suddenly willing to take a busioess trip to Alicante that the company has long wanted him to make. The reason has nothing to do with professional zeal, however: "I've just had word from my sister-in-law that she and her family will ar-

Getting Down to Business in England

rive in London tomorrow and they plan to stny with us for a week. So I'll leave tonight, if that's all right." Bon Voyage, Johnny! The really lucky chap is Mr. Jacksoo, in the oext dialogue, who is saved by Helen,

# Hopeless Case

his efficient secretary.

The plot turns on a sudden telephone call from Mr. Jackson's wife.

Sec.: Mr. Jackson's office. Mrs. J.: Hello, Helen, Is my husband

Sec.: I'm afraid he's out until five o'clock. Mrs. Jackson. Do you want him to call

Mrs. J.: No. I just wanted to remind him to reserve a table for dinner this evening. It's our anniversary. Sec.: Oh yes. congratulations. He told me he'd reserve a table at the Mirabelle for

Helen has, of course, been lying through her teeth. Directly Mrs. J. bas hung up she telephones the Mirabelle to make the reservation. Next thing she cancels Mr. J.'s other

dinner date and late-night fling to Paris. Another marriage saved. Coogratulations, Hel-

The most hopeless case of all, although he, too, is blessed with a good staff, is Charles Williams, who telephones his office at what one imagines to be a late morning hour. "Good morning, sir. Did you have a good time at the party last night?" his all-loo-knowing secretary asks. "Yes, it was great." he replies. One can imagine the icebag being clasped to his throbbing temple. Look, could you call the police station for me? I'm afraid my car has been stolen."

A good deal of company time is spent with the police. Finally, Mr. Williams, having perhaps exchanged the icebag for a stimulating dram of the bair of the dog, has a sudden flash of memory. His car is in his neighbor's garage where he parked it by mis-

A later dialogue begins with the premise: "There are endless problems with tele-phones in the West Central Heights area today. The operator tries to deal with the complaints as best she can." One way is to say. "I'm sorry, sir. Could you speak a little louder, please. There's a bad connection." Which is, of course, what the caller had been ringing about in the first place.

"English Telephone Conversations" may be a work of staggering realism, but is it good for Britain? The book is intended for intermediate-level students of English. Lord knows what foreigners will learn about Eog-lish management when they reach the advanced stage . . . except perhaps to switch their studies to Japanese.

She wants it. Her children want it. And as far as British actress Lynn Redgrave is concerned, they'll all get U.S. citizenship in the near future. With that in micd. Miss Redgrave broke a bottle of champagne across the bow of the cruise ship Liberty Bell, which will make Sunday trips from New Haven to Stratford. Conn., between July It and Aug. 6. Stratford is the home of the American Shakespeare Festival, where Miss Redgrave is starthis summer in "Twelfth

Philip Shinnick, a faculty member at Rutgers University who is sus pected of hoving aided Patrick Hearst when she was a fugitive ha won reinstatement as an assistan professor and director of sport studies. Shinnick, while being re turned to full-time duty and bein figure-skating champion. Button was among half a dozeo men attacked with sticks and bats by a reimbursed for money lost during two-year period in which he wa forced to work half-time, was give an unusual "terminal" contrac that will last two years. A spoke man for the university said in Ne Brunswick, N.J., that the terms ( the contract had nothing to do wit Shinnick's performance, but it volved a re-evaluation of the nee

# Frisbee Enthusiasts Proclaim That the Ball Is Dead

WASHINGTON, July II (NYT) — Ancieni Greek discus throwers probably never suspected that they would be the foreegregious is my misunderstanding runners of a toy that would surpass and patiently advise me of the facts the Hula-Hoop and yo-yo in popu-

its aerodynamic uses. The plastic disks, the Frisbees, completely and arguing among most commonly seen floating themselves about which of them is across college quadrangles and the most grievously wrong in his understanding of the facts.

HOTELS RESTAURANTS NIGHT CLUBS

HOTEL 304 East New York City. In East Side Manhatton Yom UN. Single From

delivery system for military flares spun rapidly, with a flick of the mow floated to earth by para-wrist, so it will keep its original chules at \$50 a drop. But the flares plane of rotation.

There is no my and the project was forgotten by everyone, except critics of heavy and nonessential military spending.

The war games have ended, but the Frisbee lives on, and enthusi-asts insist oo using it in almost every sport that ooce needed a ball that age-old slave of gravity. Fris-bee enthusiasts insist the ball is dead: It holds oo mystery, it simply lands, without a moment of suspen-

# A Rapid Spin

The gyroscopic principle of the

"There is no mystery to the flight of the Frisbee," said Goldie Nor-

don, promotional director for the Wham-o Co., whose disks bear the Frisbee trademark, "There is, however, wonder and amazement that a plastic disk the size of a pie can contain the same principles as an airplane in flight." he said.

An estimated 100 millioo people

have been amazed or at least amused by Frisbees over the 20 vears that Wham-O has marketed them. They now comprise more than 25 percent of the company's annual sales and about 10 million have been sold in each of the past

"The Navy experiments may have helped popularize the Frisbee, even though they only used the word as a sort of generic term and not our actual product," Mr. Nordon said. The free publicity came a stand-up comic's routine about government spending oo a television show. "We couldo't remember the

Navy purchasing \$375,000 of Frisbees," he said. "But it was nice to become a housebold word." There are at least 16 current Fris-

bee models of various diameters and weights and almost as many ways to throw and catch them. Some models have different grooves etched into their colorful polyethylene coats to give different
